## Chairman's letter

Dear Shareholders,

In any industry, the event of production reaching historical heights is usually a cause for celebration. For the sugar industry, however, it is not necessarily that sweet an occasion. With production reaching 33 million tonnes this year and the next year opening stock at 14.62 million tonnes as per ISMA (Indian Sugar Mills Association), the industry will be witness to record inventories. In spite of a potential 4 million tonnes shortfall in production next year, due to drought in the states of Maharashtra and northern parts of Karnataka, the industry will still be facing piled-up inventories. Add to this, the ₹19,000 crore of dues to be paid to cane farmers, and we have a very busy year ahead of us to rethink and re-strategise along with the Government to look for ways and means to address the host of concerns for the ailing sugar industry.

In the past year, we witnessed efforts by the Government to reduce the dues to sugar cane farmers and a direct provision of financial support to the industry. Export subsidies and policies on ethanol capacity creation were meant to bring in some financial prudence. While these were welcome measures, the desired relief and benefits are not yet visible.

The welcome step of raising of minimum sales price of sugar (sugar MSP) to ₹ 31 a kilo, though provided some relief but is still way below the average cost of production. The sugar MSP has to be more realistic. Introducing an element of dual pricing would be a welcome step, where sugar used for industrial purposes could be sold at a free market price, while sugar MSP could be reserved for the retail market. This would be a good step that would enable a test of free market pricing of sugar albeit in a limited manner.

The Government's support in creation of capacity for Ethanol production will go a long way in improving the bottom line for sugar producers. A constant demand for ethanol from oil companies

is important so that these new production capacities don't become an added challenge for the industry. Increasing the blending proportion from 7% to higher levels would help propel this demand. This would have a sustained effect on the future of the ethanol industry and give ethanol production long-term financial viability.

Present international sugar prices do not provide much relief for sugar exporters and it is essential to extend export subsidies. Several mills have not been able to fully avail their export subsidies as over 35% of the industry were not able to participate due to production deficiencies or other reasons. There were also a few who could have exported more, but whose quotas were capped. These issues need to be addressed to reap benefits from the export markets. The good news is next year there is an expected supply dearth of 2 million to 4 million tonnes in global markets that should bring prices up. The mill-specific export quota regime should be broad-based and converted to an industry-specific export target. This would enable better utilisation of the export targets and would not limit those who want to export more.

Increasing the target to 7 million tonnes next year from the present 5 million tonnes would also ease the domestic inventory status. Improved logistic infrastructure for exports would provide a helping hand too. As an example, Bangladesh imports 2.5 million tonnes of sugar from India which could be better facilitated through the waterways, and both the governments are now addressing this jointly at a policy level. Quick execution such as this could help the sugar industries based in the Northern parts of India.

Your Company continues to be the leading sugar and ethanol manufacturer in India with its fourteen sugar plants having an aggregate sugarcane crushing capacity of 1,36,000 TCD, six distilleries having aggregate capacity to produce Industrial Alcohol of 800 kilo litres per day, and fourteen

co-generation plants having a total power generation capacity of 449 MW. During the year ended March 31, 2019, the Company processed 16.761 MMT of sugarcane as against 14.765 MMT in the previous year. The Company sold 19,53,160 MT of sugar and 3,28,600 MT of molasses during the year as against 14,62,198 MT of sugar and 1,21,136 MT of molasses during the previous year. The Industrial Alcohol / Ethanol production was 1,07,724 KL as against 1,13,165 KL in the previous year. Alcohol / Ethanol sale during the year was at 1,24,841 KL as against 1,17,323 KL during the previous year. During the year, Power generation at fourteen of our plants were at 949.4 Million Units (MUs) as against 852.2 MUs in the previous year. The Company exported 338.9 MUs of power as against 316.5 MUs during the previous year.

The resounding mandate for the incumbent Government at the Centre will create stability and favourable evolution of policies at all levels. We, at Bajaj Hindusthan, look forward to supporting the building of this great nation in all spheres and segments of the society. We are happy to partner the society and the government in propelling our economy to create a "New India" which we all aspire to.

As always we take great pride in our excellent team of employees whose unfailing commitment has led us into another successful year. We are an industry

where our input costs are fixed, and our output prices are defined through policy. Our managers successfully steer production and use financial foresight to execute and manage businesses despite that. The team has become adept at reinventing the wheel to circumvent every challenge that appears before them.

We are optimistic about the future. We are hopeful that the central and state governments will use this decisive mandate to bring about policy changes to minimise regulation of the sugar industry so that we can look forward to a period of robust growth. Linking cane prices to market prices of sugar remains the biggest enabler to ensuring robust growth for the sugar industry.

I take this opportunity to thank all the stakeholders including central and state government authorities, bankers, shareholders, suppliers, customers, and business associates for their support in managing the Company.

Warm regards,

**Kushagra Bajaj**

Chairman & Managing Director

On a standalone basis, the Company achieved a turnover (including other income) of ₹ 6,967.43 crore for the year ended March 31, 2019 as compared to ₹ 6,105.31 crore in the previous year. The Loss after tax is ₹ 64.08 crore as compared to the loss of ₹ 423.19 crore in the previous year. On a consolidated basis, the turnover including other income is ₹ 6,902.28 crore as compared to ₹ 6,043.69 crore in the previous year. The loss after tax and minority interest is ₹ 136.57 crore as against loss of ₹ 499.64 crore in the previous year.

## Dividend

In view of loss during the year under review, your Directors do not recommend any dividend for the current Financial Year. (Previous year - Nil)

### Dividend distribution policy

The Board of Directors at its meeting held on February 13, 2017 approved the Dividend Distribution Policy containing the requirements mentioned in regulations 43A of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015. The policy is annexed as "Annexure I" and forms part of this Report.

## Operations

The Company continues to be the leading sugar and ethanol manufacturing Company in India with its fourteen sugar plants having an aggregate sugarcane crushing capacity of 1,36,000 TCD, six distilleries having aggregate capacity to produce Industrial Alcohol of 800 kilolitres per day and fourteen co-generation plants having a total power generation capacity of 449 MW.

During the year, the operations at all the sugar, distillery and co-generation plants were satisfactory.

### Sugar

During the year ended March 31, 2019, the Company crushed 16.761 MMT of sugarcane as against 14.765 MMT in the previous year. The average recovery of sugar from sugarcane is higher due to conducive weather condition and high yield cane varieties. This year, sugar recovery was 11.40% as against 10.62% in the previous year. During the year, the Company produced 19,10,112 MT sugar (previous year 15,60,093 MT) and 7,75,934 MT molasses (previous year 6,90,184 MT).

The Company sold 19,53,160 MT of sugar and 3,28,600 MT of molasses during the year as against 14,62,198 MT of sugar and 1,21,136 MT of molasses during the previous year.

## Distillery

The Industrial Alcohol / Ethanol production was 1,07,724 KL as against 1,13,165 KL in the previous year. Alcohol / Ethanol sale during the year was at 1,24,841 KL as against 1,17,323 KL during the previous year.

## Power

The operations of power generation were smooth at all the fourteen plants. While most of the power generated by us continued to be used for captive consumption to run our plants, the surplus power was sold to the Uttar Pradesh state grid.

During the year, Power generation was at 949.4 Million Units (MUs) as against 852.2 MUs in the previous year. The Company exported 338.9 MUs of power as against 316.5 MUs during the previous year.

## Sale of shares

As per the Master Restructuring Agreement dated December 30, 2014 and the Master Framework Agreement dated December 16, 2017 executed with the lenders to implement the debt restructuring scheme, the Company is under obligation to divest its non-core assets. Accordingly, it was proposed to sell the entire 1,54,39,900 Equity Shares of ₹ 10/- each, constituting 17.51% of the paid-up capital of Lalitpur Power Generation Company Limited ("LPGCL") held by the Company. The shareholders at an Extra ordinary general meeting held on August 04, 2018 approved the sale of LPGCL shares held by the Company to Bajaj Energy Limited (BEL), a group company. Bajaj Energy Ltd. is proposing an IPO of ₹ 5,450 crore, DRHP for which was filed with SEBI on April 5, 2019. A part of the funds to be received by BEL under the proposed IPO, shall be utilised to facilitate providing funds to BHSL. The sale of shares will be concluded after completion of IPO of BEL.

## Listing of securities

The Company's equity shares are listed on the BSE Limited and National Stock Exchange of India Limited. The Annual Listing fees to each of these Stock Exchanges have been paid by the Company.

## Subsidiary and Associate Companies

As on March 31, 2019, the Company had the following Subsidiaries and Associates, all of them are presently unlisted:

Subsidiaries:

1. Bajaj Aviation Private Limited (BAPL) – (Holding 100%).
2. Bajaj Power Generation Private Limited (BPGPL) – (Holding 100%).
3. Bajaj Hindusthan (Singapore) Private Limited (BHSPL) – (Holding 100%).
4. PT. Batu Bumi Persada, Indonesia – (step down subsidiary being 99.00% subsidiary of BHSPL).
5. PT. Jangkar Prima, Indonesia – (step down subsidiary being 99.88% subsidiary of BHSPL).

Associate:

1. Bajaj Ebiz Private Limited – (Holding 49.50%).

## Performance and financial positions of subsidiaries and associates

- a) Bajaj Aviation Private Limited: BAPL continued to provide Air Transport Services through Air Craft – Falcon LX 2000. In addition to this, the Company also leased out its Helicopter – Bell 407 to another Company providing Air Transportation Services.
- b) Bajaj Power Generation Private Limited: No substantial progress could be made as regards proposed 1980 MW (3x 660 MW) power project to be set up by the Company through its wholly-owned subsidiary, Bajaj Power Generation Private Limited (BPGPL), primarily due to non-execution of water use agreement. While the Company continued its all-out efforts to seek confirmation from Uttar Pradesh Power Corporation Limited (UPPCL) to facilitate supply of water, in absence thereof it could not obtain coal linkage from Standing Linkage Committee. On the other hand, the Company received a termination notice from UPPCL to terminate Power Purchase Agreement (PPA). The Notice was duly contested by the Company, leading to litigation in this regard. Consequently, pursuant to an Order passed by Uttar Pradesh Electricity Regulatory Commission, the PPA stands terminated.

In view of the progress already made during the earlier years, BPGPL is exploring various alternatives and taking necessary steps for setting up the project.

- c) Bajaj Hindusthan (Singapore) Private Limited: BHSPL through its two subsidiaries in Indonesia, continued to hold coal mines in Indonesia which are in the process of being developed.
- d) PT. Jangkar Prima (PTJP), Indonesia and PT. Batu Bumi Persada (PTBBP), Indonesia: PTJP and PTBBP are engaged in the business of Mining and Mining services including consulting, planning, implementation and testing of equipment

in the field of construction of mining. These subsidiaries are in the process of development of a coal mine and received various clearances in this regard except for the forestry clearance and the clearance for the jetty site for which necessary efforts to expedite the matter with concerned authorities are being made. Operation of coal mine is expected to start in the next one year.

- e) Bajaj Ebiz Private Limited: Bajaj Ebiz did not carry out any business during the year.

Pursuant to the provisions of Section 129 of the Companies Act, 2013 and Rule 5 of the Companies (Accounts) Rules 2014, statement containing the salient features of the financial statements of its subsidiaries/associate companies in the manner prescribed under the Companies Act, 2013 is given as Annexure to the Consolidated Financial Statements.

## Auditors and auditors' report

### Auditors and their report

Chaturvedi & Shah LLP, (formerly M/s. Chaturvedi & Shah, Chartered Accountants) Firm Registration No.101720W/W100355 were appointed as Auditors of the Company for five consecutive years at the conclusion of the 83rd Annual General Meeting till conclusion of the 88th Annual General Meeting.

The auditors in their report to the members, have given qualification, observation, emphasis of matter and key audit matters and the explanation/comments of your directors with respect to it are as follows:

#### 1. Explanation to Sr. no. 2 of the Audit report regarding Qualified opinion

As per the Master Framework Agreement (MFA) executed between the Company and Lenders on December 16, 2017 pursuant to the S4A Scheme, the Company is regularly servicing the coupon rate attached to the Optionally Convertible Debentures (OCDs). The difference between weighted average interest and coupon rate being Yield to Maturity (YTM) though, accruing on annual basis from the date of allotment is payable as redemption premium in a phased manner in 13 equal instalments commencing from the Financial Year 2024-25. The management is of the view that such YTM as redemption premium is payable only in the event of redemption of OCDs and not upon the conversion of the OCDs into the equity shares of the Company, based on the right of conversion as may be exercised by the holders from time to time. Accordingly, the Management considers such YTM as a contingent liability and has not provided the premium in the books of the Company.

#### 2. Explanation to Sr. no. 3 of the Audit report regarding Material Uncertainty related to Going Concern

Management expects to generate positive cash flow from operation this year based on improvement in sugar recovery percentage and also expects further improvement in the operational efficiencies in other parameters based on various corrective measures taken by the Company including the restructuring of debts as stated in the said note and the Company expects to receive benefits under the Sugar Promotion Policy 2004 pursuant to a favourable Order of Hon'ble Supreme Court of India.

The Company also has taken steps for sale of non-core assets by way of sale of investments in Lalitpur Power Generation Company Limited. After receipt of the sale proceeds the loans of the Company and interest burden will be reduced substantially.

Accordingly, the Management is of the view that going concern of the accounting is appropriate.

#### 3. Comments to Sr. no. 4 of the Audit report regarding Emphasis of Matter

As per the debt restructuring schemes obligation was casted on the Company and promoters to recover the outstanding loans in phased manner. The Company also has taken steps for sale of non-core assets by way of sale of investments in Lalitpur Power Generation Company Limited.

#### 4. Comments to Sr. nos. 6 and 7 of the Audit report regarding Impairment assessment for Investments, loans and interest on loan related party companies

Please refer the comments on Sr. 3 above regarding recovery of outstanding loans and sale of investment and accordingly no impairment have been identified by the management based on above assessment.

# ANNEXURE I

## DIVIDEND DISTRIBUTION POLICY

### 1. Introduction

In accordance with the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Board of the Company, has adopted this Policy.

The intent of the Policy is to broadly specify the external and internal factors including financial parameters that shall be considered while declaring dividend and the circumstances under which the shareholders of the Company may or may not expect dividend and how the retained earnings shall be utilised, etc.

The Policy shall not apply to:

- Determination and declaration of dividend on preference shares, as and when issued by the Company, as the same will be as per the terms of issue approved by the shareholders
- Issue of bonus shares by the Company
- Buyback of securities

The Policy is not an alternative to the decision of the Board for recommending dividend, which is made every year after taking into consideration all the relevant circumstances enumerated hereunder or other factors as may be decided as relevant by the Board.

### 2. Definitions

- (i) **"Act"** shall mean the Companies Act, 2013 and rules made thereunder, as amended from time to time.
- (ii) **"Board"** shall mean board of directors of the Company.
- (iii) **"Company"** shall mean Bajaj Hindusthan Sugar Limited.
- (iv) **"Dividend"** includes any interim dividend.
- (v) **"Listing Regulations"** shall mean the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.
- (vi) **"Policy"** shall mean this dividend distribution policy.
- (vii) **"Stock Exchange"** shall mean a recognised Stock Exchange on which the securities of the Company are listed.

### 3. Policy

#### A. Parameters and Factors for Declaration of Dividend

The dividend pay-out decision of the Board depends upon certain financial parameters and internal and external factors, including:

##### Financial parameters and Internal Factors:

- (i) Operating cash flow of the Company
- (ii) Profit earned during the year
- (iii) Profit available for distribution
- (iv) Earnings Per Share (EPS)
- (v) Working capital requirements
- (vi) Capital expenditure requirement
- (vii) Business expansion and growth
- (viii) Likelihood of crystallisation of contingent liabilities, if any
- (ix) Additional investment in subsidiaries and associates of the Company
- (x) Upgradation of technology and physical infrastructure
- (xi) Creation of contingency fund
- (xii) Cost of borrowing
- (xiii) Past dividend payout ratio / trends

##### External Factors:

- (i) Economic environment
- (ii) Capital markets
- (iii) Global conditions
- (iv) Statutory provisions and guidelines

**B. Circumstances under which the shareholders of the Company may or may not expect Dividend**

The decision regarding dividend payout is a crucial decision as it determines the amount of profit to be distributed among shareholders of the Company and the amount of profit to be retained in business. The decision seeks to balance the dual objectives of appropriately rewarding shareholders through dividends and retaining profits in order to maintain a healthy capital adequacy ratio to support future growth. The shareholders of the Company may not expect dividend in the following circumstances, subject to discretion of the Board of Directors:

- (i) Proposed expansion plans requiring higher capital allocation
- (ii) Decision to undertake any acquisitions, amalgamation, merger, joint ventures, etc. which requires significant capital outflow
- (iii) Requirement of higher working capital for the purpose of business of the Company
- (iv) Proposal for buy-back of securities
- (v) In the event of loss or inadequacy of profit

**C. Utilisation of the retained earnings**

The Board may retain its earnings in order to make better use of the available funds and increase the value of the stakeholders in the long run. The decision of utilisation of the retained earnings of the Company shall be based on the following factors:

- Expansion and modernisation plan
- Long-term strategic plans
- Replacement of capital assets
- Where the cost of debt is expensive
- Such other criteria as the Board may deem fit from time to time

**D. Manner of Dividend payout****In case of final dividend:**

- (i) Recommendation, if any, shall be done by the Board, usually in the Board meeting that considers and approves the annual financial statements, subject to approval of the shareholders of the Company.
- (ii) The dividend as recommended by the Board shall be approved/declared at the Annual General Meeting of the Company.
- (iii) The payment of dividends shall be made within the statutorily prescribed period from the date of declaration, to those shareholders who are entitled to receive the dividend on the record date/book closure period, as per the applicable law.

**In case of interim dividend:**

- (i) Interim dividend, if any, shall be declared by the Board.
- (ii) Before declaring interim dividend, the Board shall consider the financial position of the Company that allows the payment of such dividend.
- (iii) The payment of dividends shall be made within the statutorily prescribed period from the date of declaration to the shareholders entitled to receive the dividend on the record date, as per the applicable laws.
- (iv) In case no final dividend is declared, interim dividend paid during the year, if any, will be regarded as final dividend in the Annual General Meeting.

**4. Parameters adopted in relation to various classes of shares**

The Company has issued only one class of equity shares with equal voting rights. Accordingly, all members are entitled to receive the same amount of dividend per equity share. The Policy shall be suitably modified upon the issue of equity shares of a different class.

**5. Policy Review and Amendments**

The Board reserves the power to review and amend this Policy from time to time. All provisions of this Policy would be subject to revision or amendment in accordance with applicable law as may be issued by relevant statutory, regulatory or governmental authorities, from time to time. In case of any amendment(s), clarification(s), circular(s), etc. issued by the relevant authorities are not consistent with the provisions laid down under this Policy, then such amendment(s), clarification(s), circular(s), etc. shall prevail upon the provisions hereunder.

## ANNEXURE IX

**Disclosure of particulars with respect to conservation of energy, technology absorption and foreign exchange earnings and outgo as required under Section 134(3)(m) of the Companies Act, 2013 read with Rule 8(3) of the Companies (Accounts) Rules, 2014.**

### **A. Conservation of energy:**

#### **(i) Steps taken for conservation of energy:**

1. Zero liquid discharge as per Central Pollution Control Board / National Tribunal directions.
2. Cooling tower installed on Under Ground Reservoir (UGR) for cooling of excess condensate water was commissioned and made operational under zero water discharge programme.
3. Grease is used at mills as lubricants which reduce the consumption of lubricants & same time pollution load on ETP also reduces.
4. Stopped sending 7 Kg/cm sq. live steam to process by installation of E-boiler at Sulphur furnace as well as chemical cleaning of evaporator body being done on 1.5 kg/cm sq exhaust steam which has increased the power export.
5. Additional power capacitor provided in the power house and all MCC (Motor Control Centre) room with PCC (Power Control Centre) to increase power factor to reduce power consumption.
6. Installation of Variable Frequency Drives (VFD) at ID fan, SA fan, feed pump and clear juice pump to save energy.
7. Installation of automation of pump for overhead tank from UGR for on-off according to overhead tank level.
8. Use of LED lights in place of simple bulb, tube light and Vapour Mercury lamp for lighting in colony and factory to reduce the power load.
9. Installation of auto system spray engineering device to reduce power consumption by reduction of injection water.
10. Installation of automation of pump for overhead tank from UGR.
11. 100% lagging of steam carrying lines to minimise heat loss.
12. Automation in operation through DCS at Mill & Boiler sections to reduce power consumption.
13. Synchronisation and reorientation of equipments in individual sections to reduce power load.
14. Installation of Digital AVR on 15 MW. Both Turbines will run parallel with Grid and Power export can increase if sugar plant will run on optimum capacity.
15. Pump having smaller capacity installed at UGR for water re-circulation during off season which saved approximately 50% of previous power consumption.
16. Clear juice heating by 1st vapour instead of exhaust to save energy.
17. Exhaust vapour drain collected and recycled in system to save energy.
18. Sulphur furnace live steam drain collected & reused.
19. Exhaust steam used during Soda boiling in Evaporator, condensate going to drain has been collected & used.
20. Various Hot Water & Cold Water consumption points flow meter has been provided to control effluent & power.
21. Replacement of the nickel screen 0.05 mm to 0.06 mm for Reduction of molasses, Power saving, reduction of nickel screen consumption, increase of machine capacity, better quality of sugar.
22. Increase of the height of H'on cutter by 50 mm resulting in reducing the power consumption by 20%.
23. Masseccuite and magma delivery pipe line relocate from vertical (90° to 45°) resulting Zero leakages from gland, reduction of power and reduction of maintenance cost.
24. DCS based auto blow off of 1st vapour to 2nd vapour instead of going to atmosphere.
25. By providing control valves and modifying heating steam coil in A Heavy and B Heavy molasses conditioners at pan floor conditioning of molasses improved and resulted better circulation in pan and reduced boiling time.
26. Installation of centralised lubrication system for mill roller bearings to reduce lubricant consumption.

#### **(ii) Steps taken by the Company for utilising alternate sources of energy:**

1. Maximum utilisation of biogas in 30-Tonne Per Hour Boiler to save bagasse consumption.
2. Use biogas in B G Engine to generate the power.

#### **(iii) Capital investment on energy conservation equipment: Nil**

## B. Technology absorption:

### (i) Efforts made towards technology absorption:

Research and Development (R&D): Under Sugarcane Research & Development, specific areas in which R&D is carried out by the Company during the year ended March 31, 2019 were accelerated as under:

1. Installation of 04 Nos. Vertical type Coolers for 300 Kg. Cap. Batch Sulphur Furnace to improve the efficiency, avoid leakages and to reduce the breakdowns.

- d. For Audit Qualification(s) where the impact is quantified by the auditor, Management's Views:** Quantification is given in the note mentioned in para a above.

Management's view: As per the Master Framework Agreement (MFA) executed between the Company and Lenders on December 16, 2017 pursuant to the S4A Scheme, the company is regularly servicing the coupon rate attached to the Optionally Convertible Debentures (OCDs). The difference between weighted average interest and coupon rate being Yield to Maturity (YTM) though, accruing on annual basis from the date of allotment is payable as redemption premium in a phased manner in 13 equal instalments commencing from the Financial year 2024-25. Based on the legal opinion obtained, the management is of the view that such YTM as redemption premium is payable only in the event of redemption of OCDs and not upon the conversion of the OCDs into the equity shares of the Company, based on the right of conversion as may be exercised by the holders from time to time. Accordingly, the management considers such YTM as contingent liability and has not provided the premium in the books of the Company.

### Disclosures with respect to unclaimed/unpaid dividend

Unclaimed dividends up to 1995-96 have been transferred to the General Revenue Account of the Central Government. Those who have not encashed their dividend warrants for the period prior to including 1995-96 are requested to claim the amount from Registrar of Companies – Maharashtra, CGO Building, 2nd Floor, "A" Wing, Opp. Police Commissioner's Office, C.B.D. Belapur, Navi Mumbai - 400 614.

In view of amended Section 205C of the Companies Act, 1956, followed by the issue of Investor Education and Protection Fund (Awareness and Protection of Investors) Rules, 2001, any money transferred by the Company to the unpaid dividend account and remaining unclaimed for a period of seven years from the date of such transfer shall be transferred by the Company to a fund called Investor Education and Protection Fund (the fund) set up by the Central Government.

Accordingly, unpaid/unclaimed dividends for the years 1997-98 to 2009-10 were transferred by the Company to the said fund on respective due dates. This would be followed by the transfer of the amounts of unpaid/unclaimed dividends every year in respect of dividends for subsequent years. Shareholders are therefore requested to verify their records and send claims, if any, for the relevant years from 2010-11 onwards, before the respective amounts become due for transfer to the fund. The details of unclaimed dividend are as under:

Year	No. of shareholders	Amount (₹)	Due date of transfer to Investor Education and Protection Fund
2011-12	24,328	6,17,210.60	21/03/2020

No dividend was declared during FY 2012-14, 2014-15, 2015-16, 2016-17 and 2017-18.

# Management Discussion and Analysis

## I. Global Scenario

After 2 consistent years of deficit Sugar Production during the year 2015-16 & 2016-17, next 2 years 2017-18 & 2018-19 turned out to be surplus years thereby adversely affecting the Sugar Prices.

The graph of ICE 11 (Raw Sugar) and LIFFE (White Sugar) prices illustrating the price fall since the Year 2016 on account of excess sugar in system is given below:-

**Chart 1: ICE 11 (Raw Sugar) - Daily Settlement Price**

**Chart 2: LIFFE (White Sugar) - Daily Settlement Price**

From the above price graph of 3 years, it can be observed that Sugar prices has come down quite significantly where ICE 11 price has come by 47% from the level of 23.8 cents / pound to the level of 12.5 cents by end of March.

Similarly, LIFFE (White Sugar) price has come down by 46% from the level of 600 USD/ MT to the level of 325 USD/MT by end of March.

Global Sugar surplus during the Years 2017-2018 & 2018-2019 has mainly been on account of increased contribution from Northern Hemisphere countries including India.

Due to drop in Sugar prices as illustrated in above graphs, Ethanol has become more viable as compared to Sugar and Cane diversion towards Sugar has come down quite significantly in Brazil.

During the crush year 2018-2019, Cane diversion in Brazil CS has come down to the level of 35.2% from the level of 46.46% last year (2017-2018).

Due to such reduced diversion of cane towards Sugar and also lower cane crush, Sugar Production in Brazil CS has come down by 9.56 Million MT during the year 2018-2019.

In spite of Brazil Sugar production coming down during the Year 2018-2019, Global Sugar Production is in surplus for which Indian crop has played a major role.

During the year 2017-2018, India has emerged as the largest Sugar producer across the globe producing 32.5 Million MT and surpassing Brazil (both Centre South and North East) producing 29.04 Million MT. Before 2017-18, Brazil has consistently been the largest producer of Sugar in the world. India is poised to repeat the status of the largest producer of Sugar globally during the Year 2018-2019 as well as surpassing Brazil crop.

It has been observed that over the years, India plays a big swing factor in Global balance sheet and Global surplus / deficit coincides with Indian surplus / deficit.

Indian Sugar Production is quite volatile and any increase in Indian Sugar Production gives surplus sugar to Global balance sheet and any dip in Indian Sugar Production turns Global Sugar Production in deficit.

Following table will clearly reflect the coinciding of Global surplus / deficit with Indian Sugar surplus / deficit

**Table 1: Global & Indian Scenario**

## Sugar Price

The Graphical movement of International Sugar Prices during April 2018 – March 2019 are as under:-

**Chart 4: Raw Sugar Settlement Price during 2018-2019**

**Chart 5: LIFFE Price Movement during 2018-2019**

The above prices are front month daily settlement prices of ICE 11 & LIFFE exchange prices.

From above price graph for the period April 2018 – March 2019, it can be observed that ICE 11 (Raw Sugar) price has been hovering around 12 cents level with a brief stint at 10 cents and 14 cents / pound level.

During April – Oct 2018, ICE 11 prices has moved mainly between 11 – 12 cents and thereafter remained between 12 – 13 cents till March 2019.

Similarly, LIFFE (White Sugar) prices has hovered around the level of 340 USD/MT except a brief stint at 310 USD/MT level and then 390 USD/MT.

During the period April 2018 – March 2019, White Sugar premium (Margin over Raw Sugar for White Sugar) has come down quite steeply from the level of 80 USD/MT to the level of 50 USD/MT.

## Influence factors during the Year 2018-2019

### India :

India being the largest Sugar producer during the Year 2017-2018 and estimated to repeat status of the largest producer during 2018-2019 and also the largest consumer of Sugar, plays a major role in shaping the World Prices. India Sugar Production during 2017-2018 has been record high at level of 32.5 Million MT and Year 2018-2019 is turning out to be a bigger Year where Sugar Production is pegged at level of 33.0 Million MT.

During 2018-2019 (Oct – Sept), Sugar Exports from the country are expected at the level of 3.5 Million MT. Looking into big carryover of Sugar for next Year 2019-2020, it is estimated that Sugar Exports will continue next year as well.

Preliminary estimates suggest that during the Year 2019-2020, Sugar Production will come down from 2018-2019 estimated level of 33.0 Million MT to the level of 28 – 29 Million MT and this dip is primarily on account of drop in states of Maharashtra and Karnataka.

**Brazil CS :****Table 4: Cane Crush / Sugar Production / Ethanol Production – Brazil CS**

Particulars	Unit	2015-2016	2016-2017	2017-2018	2018-2019
		Actual	Actual	Actual	Actual
Total Cane Crush	Million MT	617.71	607.14	596.31	573.07
Sugar Production	Million MT	31.22	35.63	36.06	26.50

TRS		130.50	133.03	136.60	137.87

Source : UNICA

Brazil CS report card for the Year 2018-2019 is unique in many ways as under:-

- Year 2018-2019 saw record Ethanol Production to level of 30.95 billion litres which is 18.6% higher than production last year and 9.6% higher than last record Ethanol Production of 28.23 billion litres during 2015-16.
- Due to dismal Sugar Prices and better Ethanol prices, cane diversion towards Sugar has come down to the level of 35.2% from last year level of 46.46%.
- Sugar Production during 2018-19 is down to the level of 26.50 Million MT which is down by 9.56 Million MT i.e. 26.5% as compared to last year.
- This year has witnessed very good TRS level at 137.87 which is highest since the Year 2010-11.
- Agricultural productivity of Cane crops in the Brazil Centre-South reached 73.34 tonnes per hectare in 2018-19, down 3.31% from 75.85 tonnes in 2017-18, according to data by the Cane Technology Centre (CTC).
- There is increasing trend of Ethanol Production from Corn in Brazil and during 2018-19, Corn Ethanol production increased by 50% to the level of 0.791 billion litres.

So, Brazilian season 2018-2019 has been a balancing factor where Sugar production corrected itself and averted increase in surplus due to weak Sugar prices.

**Thailand:**

During 2018-19, the Sugar crop is estimated to turn lower by about 10% to the level of 13.0 Million MT due to weak monsoon, as compared to an all-time high of 2017-18 sugar production at level of 14.4 Million MT. Due to depressed Sugar prices, Cane price has turned lower significantly and with such a price decrease, alternate crops like cassava offers a better revenue and their area will grow at the expense of Cane. So during 2019-20, Thai Sugar Production is estimated to further decline to the level of 12.0 Million MT.

Due to higher production, slow demand and weak price, Industry is also contemplating to shift Cane for Ethanol manufacturing. As per Industry sources, there is also a potential to shift excess sugar to produce PLA (Poly Lactic Acid) and Polyactide Plastic (a bio-degradable plastic alternative to plastic derived from crude) and functional food and enzymes.

**EU:**

EU Sugar Production during 2019-2020 is expected to be more or less same as that of the Year 2018-2019 at the level of 18 Million MT with only the exception of weather in coming six months affecting beet plantation.

## II. Indian Scenario

Indian Sugar Production has historically been cyclical in nature with 3-4 years of bumper crop usually followed by 2 years of shortfall. The shortage years helped restore Mills' health by liquidating excess stocks and lifting market prices for Sugar thereby benefiting farmers. However, this cyclical pattern has been broken lately, with Sugar production outpacing consumption since the Year 2010-11 till current Year except the Year 2016-17 when Sugar production dipped to the level of just 20.3 Million MT mainly due to drought conditions.

Sugar Years 2017-2018 and 2018-2019 have witnessed record Sugar production much higher than the consumption leading to excess supply in market / high stocks of Sugar.

During the Sugar Year 2017-2018 (Oct – Sept), All India Sugar Production achieved historically high number of 32.48 Million MT which has never been achieved in the past. With this kind of Production figure, India became the largest producer of

Sugar in the world surpassing Brazil which earlier has always been the largest Sugar producer on consistent basis. Increasing pace of Sugar Production did not stop in 2017-2018 and Sugar Year 2018-2019 is again poised for a bumper Sugar crop estimated at the level of 33.0 Million MT which is even higher than production in Sugar Year 2017-2018.

The All India Sugar Production pattern since 1980 represented below by means of a graph:-

**Chart 6: Sugar Production pattern since 1980**

**Table 5: State-wise Sugar Production on All India basis since the Year 2013-14 given below in Table**

Unit : Million MT

Sr.No.	STATE	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19 (Estimated)
1	Uttar Pradesh	6.5	7.1	6.8	8.8	12.0	12.0
2	Maharashtra	7.7	10.5	8.4	4.2	10.7	10.7
3	Karnataka	4.2	4.9	4.0	2.2	3.8	4.5

5	Andhra Pradesh	0.7	0.6	0.6	0.4	0.5	0.5
6	Punjab	0.5	0.5	0.7	0.7	0.8	0.7
7	Haryana	0.5	0.6	0.5	0.7	0.8	0.7
8	Bihar	0.6	0.5	0.5	0.5	0.7	0.7
9	Tamil Nadu	1.5	1.3	1.4	1.1	0.7	0.9

	<b>Total</b>	<b>24.4</b>	<b>28.3</b>	<b>25.1</b>	<b>20.3</b>	<b>32.5</b>	<b>33.0</b>

From above table, it can be seen that earlier, Maharashtra State used to take the lead in terms of highest Sugar Production but last 3 years U.P. State has taken the lead and has emerged as the consistent largest producer of Sugar in the country due to better yields and improved Sugar recovery. U.P. Sugar Production which earlier used to be in the range of 6 - 7 Million MT has started producing Sugar to the level of 12.0 Million MT and that too consistently for second year in a row now.

It can be observed that Sugar Production in the State of Maharashtra has been quite volatile where Sugar production figure of 10.5 Million MT during the Year 2014-2015 dipped to the low of 4.2 Million MT during 2016-17 and again bounced back to 10.7 Million MT very next year i.e. 2017-2018.

In the State of Tamil Nadu, Sugar production has come down quite significantly in the last 3 years mainly due to drought conditions. Though during the Year 2018-2019 Sugar production is recovering to levels of 0.9 Million MT but it is still quite dismal to Production level as compared to normal production levels of 1.5 Million MT 5 years back. 3 states i.e. U.P., Maharashtra and Karnataka have improved a lot on Production front and forms almost 80% of Sugar production on All India basis. The improved Production levels are on account of improved yields in number of states and improved Sugar recovery mainly in state of U.P.

The details of yields and recovery of various states from where it can be seen that how the productivity in terms of yield and recovery has improved:-

**Table 6: Statewise Yield of Sugarcane**

State	(MT/hectare)				
	2013-14	2014-15	2015-16	2016-17	2017-18
Maharashtra	80	93	76	60	108
U.P.	53	55	53	62	77
Karnataka	88	94	78	60	94.5

M.P. & Chhattisgarh	57	60	51	54	71
Uttarakhand	54	53	51	57	65
Odisha	50	50	50	38	40

From above, it can be observed that Yield of all states across the country has significantly increased during the Year 2017-2018 (except Tamil Nadu where it has dropped).

Andhra Pradesh	9.74	9.38	9.35	9.37	9.53
Punjab	9.43	9.42	10.06	9.78	9.78
Haryana	9.44	9.94	10.52	10.34	10.39
Bihar	8.97	9.18	9.77	9.21	9.58
M.P. & Chhattisgarh	9.71	9.48	9.78	9.7	9.63
Uttarakhand	8.9	9.24	9.61	9.85	10.24

From the above table, it can be observed that Sugar recovery of U.P., Haryana & Uttarakhand has significantly improved in the last 5 years.

## All India Sugar Balance Sheet

**Table 8: Domestic Production and Consumption**

Particulars	Unit : Million MT						
	2012-13 (Actual)	2013-14 (Actual)	2014-15 (Actual)	2015-16 (Actual)	2016-17 (Actual)	2017-18 (Actual)	2018-19 (Estimated)
<b>A. Total availability - All India - Sugar Season</b>							
a) Opening Stock as on Oct 01	6.6	9.3	7.5	9.1	7.8	3.9	10.7
b) Production during season	25.1	24.4	28.3	25.1	20.3	32.5	33.0
c) Imports	0.7	0.1	0.0	0.0	0.4	0.2	0.0
<b>Total supply availability</b>	<b>32.4</b>	<b>33.8</b>	<b>35.8</b>	<b>34.2</b>	<b>28.5</b>	<b>36.6</b>	<b>43.7</b>
<b>B. Total Sugar Offtake : All India - Sugar Season</b>							
a) Internal consumption	22.8	24.2	25.6	24.8	24.6	25.4	26.0
b) Exports	0.3	2.1	1.1	1.7	0.05	0.5	3.5
<b>Total Offtake</b>	<b>23.1</b>	<b>26.3</b>	<b>26.7</b>	<b>26.5</b>	<b>24.6</b>	<b>25.9</b>	<b>29.5</b>
<b>C. Closing Stock as on Sept 30 - All India</b>	<b>9.3</b>	<b>7.5</b>	<b>9.1</b>	<b>7.8</b>	<b>3.9</b>	<b>10.7</b>	<b>14.2</b>
<b>D. Stock as % of Internal Consumption (%)</b>	<b>40.8</b>	<b>30.9</b>	<b>35.5</b>	<b>31.3</b>	<b>15.8</b>	<b>42.2</b>	<b>54.6</b>

From the above table, following can be observed:-

Sugar Production is consistently higher than the consumption all these Years except the Year 2016-2017 when Sugar Production dipped to an alarming low level of 20.3 Million MT because of drought conditions.

Sugar internal consumption increasing from the level of 22.8 Million MT during 2012-2013 to an estimated level of 26.0 Million MT during 2018-2019 which means consumption growth of 2.2% CGAR. Due to consistent high Sugar Production, there has hardly been any import of Sugar in the last 6 years except small quantity of 0.7 Million MT during 2012-13. Export of Sugar has been continuing on consistent basis and it is estimated that during current Year 2018-2019 Sugar export will be to the tune of 3.5 Million MT.

Sugar closing stocks increasing from the level of 3.9 Million MT during the Year 2016-2017 to the estimated level of 14.2 Million MT during the Year 2018-2019. Estimated stocks of 14.2 Million MT at the end of Year 2018-2019 is 55% of Internal consumption means sufficient to take care of almost 7 months of consumption.

So, year-after-year Sugar surplus is increasing and excess Sugar in the system is becoming a problem for the Industry and also farmers.

### Pattern of All India Sugar Exports / Imports

The pattern of All India Sugar Exports & Imports in graphical pattern since the Year 2001-02 is illustrated below:

**Chart 7: All India Sugar Exports / Imports**

Till the Year 2010-2011, Sugar production was cyclical in nature and this cyclicity in Sugar Production led to cyclicity of Sugar Exports & Imports. During the years of surplus, country exported Sugar and during the years of deficit, country imported Sugar and thus it became a big swing factor for Global Sugar demand-supply balance sheet as well.

From the above graph, it can be seen that till the Year 2010-2011, Sugar import and export has been cyclical means after every 2-3 years, either country is exporting Sugar or importing Sugar in a big way.

However, from the year 2010-2011 onwards due to consistent higher Sugar Production much more than the demand, country had been exporting Sugar on regular basis with very little imports in between.

### Policy initiatives by the Government

The major challenge with the Government is to solve the problem of excess Sugar supply in market due to consistent high record Sugar production during the Years 2017-2018 and 2018-2019.

During 2017-2018, Sugar stock had been 42.2% of domestic consumption which by the end of Sugar Year 2018-2019 are expected to rise to 54.6% of domestic consumption which means stocks to take care of almost 7 months of domestic consumption.

Ideally, problem of surplus would have been resolved on its own through demand-supply fundamental dynamics, had there been total decontrol of Sugar sector including Cane price or recommendations of Rangarajan Committee linking cane price with Sugar implemented.

But there is fixed remunerative Cane price being paid to farmers which is not linked with Sugar price, so heat of excess Sugar supply and falling Sugar prices is not going to farmers.

Due to fixed remunerative Cane price which currently is significantly better than alternate crops, Farming community is inclined more towards cane resulting into increased acreage and excess supply.

Quite lately, thanks to better cane variety resulting into improved yields across the country and recovery more particularly in state of U.P., Sugar production is taking leaps and bounds across the country.

On one hand, Government's task is to solve the problem of Sugar surplus, on the other hand the challenge is to provide the much-needed liquidity and viable Sugar prices to Industry to enable pay for Cane dues, for which Government took following policy measure's :-

### A) MSP (Minimum Selling Price of Sugar)

Due to high Sugar production resulting into excess Sugar supply in market, Sugar prices across the country started coming down and had come down below the cost of Production. To arrest falling Sugar prices, Government fixed Minimum uniform selling price of Sugar at Mill level, across the country as under:-

- On June 6, 2018, Government approved fixing of Minimum Price of ₹ 29.0 per Kg for Sugar below which no Sugar Mill can sell in domestic market.
- On February 14, 2019, Government increased MSP of Sugar from the level of ₹ 29 per Kg to ₹ 31 per Kg.

Industry Associations are advocating for higher MSP to the level of ₹ 35 – 36 per Kg which is under Government consideration.

### B) Controlling Sugar Supply in market (Reverse stock limit on Sugar Mills / Monthly Quota)

On one hand Government fixed Minimum Selling Price of Sugar, on the other hand Government imposed Reverse stock limit on Sugar Mills to control supply of Sugar in market, so that Sugar Mills are able to realise MSP / viable prices.

#### Sugar Year 2017-2018

Government imposed Stock limit (Reverse) on Sugar Mills for the month of February 2018 and March 2018, with details of the limit as under:-

- **February 2018** : At the end of February 2018, Mills will be required to keep minimum stock as below :-  
83% of the closing stock on the last day of January 2018 month + Sugar produced during February 2018 month - Sugar Exported during February 2018 month.  
(It means that during February 2018 month, Mills can sell only 17% of the closing stock as on January 2018 month).
- **March 2018** : At the end of March 2018, Mills will be required to keep minimum stock as below:-  
86% of the closing stock on the last day of February 2018 month + Sugar produced during March 2018 month - Sugar Exported during March 2018 month.  
(It means that during March 2018 month, Mills can sell only 14% of the closing stock as on February 2018 month).

**Stock limit on Traders:** During the Sugar Year 2017-2018, Government removed Stock limit which earlier was imposed on Sugar Traders to restrict illegal stocking of Sugar at their end.

Removal of such stock limit on Traders enabled them for Free trade of sugar with no restriction of quantity which a trader can buy and store at any point of time.

#### Sugar Year 2018-2019

On June 7, 2018, Government re-imposed reverse Stock limit on Sugar Mills stating that all producers of Sugar by vacuum pan process shall hold such quantity of Sugar (white or refined) at the end of each month as may be specified by the Central Government for each month.

To arrive at the figure of stocks which Sugar Mills were required to carry at the end of each month, Sugar Mills were given Monthly Sales Quota above which Sugar Mills cannot sell in domestic market.

The purpose of above order was to restrict supply of Sugar in market which was in excess due to consistent surplus production and thus to support the Prices.

### C) Promoting Sugar Exports

#### Sugar Year 2017-2018

During March 2018, Government scrapped Export duty of 20% on Sugar to promote Sugar exports.

Further during March 2018, Government gave mandatory Export quotas to Sugar Mills totalling 2.0 Million MT on All India basis. As per the Order, Indian Sugar Mills were required to export a quantity of 2.0 Million MT by September 30, 2018.

Sugar Mills can get the Sugar exported against their Quota from other Sugar Mills (like in coastal region) to save on freight through Merchant exporters.

To boost exports, Government allowed Production subsidy of ₹ 5.5 per Qtl of cane crushed, eligibility criteria of which was that Sugar Mills should have complied all orders / directives of Department of Food & Public Distribution during the Year 2017-2018. This included Government order of Reverse Stock limit and fulfilling mandatory export quotas. Further, Sugar Mills supplying Ethanol should have also supplied 80% of the Order placed so as to be eligible for availing the said Production subsidy.

#### Sugar Year 2018-2019

On September 28, 2018, Government announced Mandatory Export Quota of 5.0 Million MT on All India basis to be exported during October 2018 – September 2019. The mandatory export quota of 5.0 Million MT was split amongst all Sugar Mills in the country basis Sugar Production of last 3 years.

On September 26, 2018, to boost Sugar Exports and for the purpose of offsetting cost of cane, Government announced the following financial assistance:-

- Government announced to pay defraying expenses towards Internal transport, freight, handling, etc. to Sugar Mills on Export of Sugar as under:-
  - ₹ 1.0 per Kg for Sugar mills within 100 kms from Port
  - ₹ 2.5 per Kg for Sugar mills beyond 100 kms from port in coastal states
  - ₹ 3.0 per Kg for Sugar Mills in non-coastal states
- Financial assistance of ₹ 13.88 per Qtl. of cane on cane crushed during the Sugar Year 2018-2019 subject to Sugar Mills complying with all the directives of Department of Food including exports quota and monthly release. The incidence of this financial assistance shall work out to approx. ₹ 8.3 per kg on Sugar exported.
- To facilitate and motivate Sugar exports, Department also decided to give additional Sale quota in domestic market to the ones exporting Sugar and reduce the domestic quota of the Sugar Mills not exporting Sugar.

## D) Discouraging Sugar Imports

During July 2017, Government increased import duty on Sugar from existing rate of 40% to 50%.

During February 2018, Government increased import duty on Sugar from 50% to 100% to completely rule out any import of Sugar as there was fear of imports from Pakistan and country don't need any Sugar imports.

There has hardly been any import of Sugar in the last 2 Sugar Years i.e. 2017-2018 and 2018-2019 and no possibility in near future because of high import duty and rightfully also as country don't need import of Sugar in current period of surplus.

## E) Soft loans / subsidy to Sugar sectors

To improve liquidity and enable Sugar Mills pay their dues, Soft loans / subsidies announced by both the Central and State Government are as under:-

- During March 2019 month, CCEA had approved soft loan to the extent of about ₹ 7,900 - 10,540 crore to Sugar Mills to enable them to pay their cane dues.  
Government will bear the interest subvention @ 7 - 10% to the extent of ₹ 553 crore to ₹ 1,054 crore for one year.  
The said soft loan will be provided to only those units which have already cleared at least 25 percent of their outstanding cane dues in the Sugar season 2018-19.
- UP State Government allowed soft loans to the tune of ₹ 4,000 crore to Sugar Mills in U.P. state for a period of 5 years at an interest cost of 5% p.a.
- UP State Government allowed Cane price subsidy @ ₹ 4.5 per Qtl. of total cane crushed during the Sugar Year 2017-2018, total incidence of which works out to approx. ₹ 500 crore for UP state as a whole.

## F) Buffer Stock / subsidy

Since, Industry has been struggling with the problem of high stocks and excess Sugar supply in market, Government decided to create buffer stock and give buffer subsidy which on one hand will provide liquidity to Sugar Mills in terms of subsidy, on the other hand will reduce supply of Sugar in market to the extent of buffer stock, with details as under:-

- During the month of June 2018, Government notified the scheme for creation and maintenance of buffer stock of 30 Lakh MT of Sugar by Sugar Mills for a period of one year starting from July 2018.
- Government allowed buffer subsidy of 13.5% per annum with breakup as under:-
  - Interest of max. 12% per annum or actual as charged by the bank whichever is less on advance given to the Sugar Mill against the buffer stock or on value of stock.
  - Insurance including storage charges at flat 1.5% per annum on the value of stock.
  - The value of stock shall be calculated basis price of ₹ 29 per Kg of Sugar.
  - The buffer subsidy will be used for payment of Cane arrears only and will be credited directly in No lien accounts to be opened by Sugar mills for the said purpose.

## G) Rationale in fixing Cane Price

Government showed rationale in fixing Cane price looking into the excess Sugar supply / depressed Sugar prices.

For the Sugar Year 2018-2019, U.P. State Government continued with the same level of SAP (State Advised Price) with no increase.

For the Sugar Year 2018-2019, Central Government increased FRP from the level of ₹ 255 per Qtl. of Cane with 9.5% Sugar recovery to ₹ 275 per Qtl. of Cane with 10.0% Sugar recovery. So, 2018-2019 FRP for 9.5% Sugar recovery Cane works out to ₹ 261.25 per Qtl. which means increase of 2.4% as against last year.

## H) Ethanol-Pricing / Feedstocks

Government is continuing to aggressively promote Ethanol as a fuel as it is non-fossil biofuel, a big curb on vehicular pollution and also saves foreign exchange required for import of crude oil as country is net importer of crude.

Further, due to surplus Sugar Production, Government is targeting Ethanol as alternate of Sugar which can be made from Cane like in Brazil which on one hand will provide adequate supply of Ethanol under Government's ambitious bio-fuel policy, on the other hand will be used to regulate Sugar Production and thus take care of excess Sugar in system.

During the Year 2017-2018 (Dec – Nov), Government increased Ethanol Basic Price from C Molasses from earlier level of ₹ 39.0 per Litre to ₹ 40.85 per Litre for supplies.

Further during Year 2018-2019 (Dec – Nov), Government increased the price of Ethanol manufactured from C Molasses from last level of ₹ 40.85 per Litre to ₹ 43.46 per Litre which means increase by almost 6.4% from last price level.

Earlier, Ethanol manufacturing and supplies were allowed from C Molasses only. But in order to boost supplies of ethanol and also to regulate Sugar production, Government decided for diversion of cane / sucrose from Sugar to Ethanol. Government decided to allow production and supply of ethanol from B Heavy Molasses and from Cane juice which on one hand will increase feedstock availability for Ethanol, on the other hand will reduce Sugar production.

Government allowed higher basic price of Ethanol from B heavy and cane juice (as compared to C Molasses Ethanol) at the level of ₹ 52.43 per Litre and ₹ 59.19 per Litre respectively.

In order to boost Ethanol supplies from B heavy Molasses and Cane Juice, Government prioritised Ethanol made from Cane Juice and B heavy Molasses over C Molasses Ethanol.

For any Oil company depot at the time of allotting order, first priority is for Cane Juice Ethanol, followed by B heavy Molasses Ethanol, then C Molasses and ultimately damaged Grain Ethanol. Government also allowed manufacturing and supply of Ethanol from damaged Grains which was not there earlier and allowed basic price of ₹ 47.13 per Litre which is higher than the price from C Molasses Ethanol at level of ₹ 43.46 per Litre.

All taxes and duties as applicable and freight as per Oil companies norms shall be paid extra. Government is continuing with the policy of restriction on Imported alcohol for blending purpose.

In order to boost Ethanol supplies from alternate feedstocks, Government is also pushing 2G Ethanol which will be manufactured from cellulosic waste. Public Sector Oil companies are in the process of setting up their own 2G Ethanol plants for generation of Ethanol for their requirement of blending with Petrol.

On July 21, 2018, Government reduced GST on Ethanol from earlier level of 18% to 5% in order to boost Ethanol sector.

## I) Soft Loans for Ethanol

In June 2018, Government had sanctioned soft loan to the tune of ₹ 6,139 crore to Sugar Mills for Ethanol capacity on which interest subvention amount is ₹ 1,332 crore.

In March 2019, CCEA cleared soft loans of ₹ 15,500 crore to Sugar Mills / standalone Distilleries for setting up new Distilleries, setting up Incineration boiler, augmentation of existing capacity. The interest subvention amount on above soft loan for a period of 5 years with one year moratorium period is ₹ 3,355 crore. Out of this figure of ₹ 15,500 crore, ₹ 12,900 crore is for Sugar Mills and ₹ 2,600 crore is for standalone Distilleries without attached Sugar units.

The above soft loan has been allowed for the purpose of:

- a) Improving liquidity of sugar mills by way of revenue from Ethanol
- b) Achieve 10% blending target of EBP
- c) Reduce sugar inventory by usage of B heavy / cane juice for ethanol manufacturing

## J) IDR Act / State Excise Fees & Procedures on Ethanol

During May 2016, there had been an amendment in IDR Act, 1951 as per which State Government can control, levy taxes / duties on liquor meant for human consumption only.

Denatured Alcohol, Industrial Alcohol not meant for human consumption will be controlled / legislated only by Central Government. It means Ethanol and denatured spirit should come out of the purview of State Govt. with no power left to regulate or impose any fees / taxes / duties on Ethanol. With active efforts of the Government, Oil Marketing companies and Industry Associations from the Year 2017-2018, number of states started scrapping State Excise fees on Ethanol and relaxing their control on distribution, storage of Ethanol.

Karnataka has been the first state to surrender their control on Denatured Ethanol and free it from State Excise Fees and permissions. Other states having followed Karnataka are the states of Gujarat, Chhattisgarh, Punjab, Haryana, Goa, Maharashtra and U.P. In the state of Delhi, Industry is seeking relief on the State Excise Fees through legal means available.

Industry is taking up the matter with various State Governments to give up control on denatured Ethanol and other spirits in line with the IDR amendment / new GST rules and reasonably good progress is continuing on the subject.

### III. Bajaj Hindusthan Sugar's (BHSL) Position

BHSL has 14 sugar plants having an aggregate crushing capacity of 136000 TCD, 6 distilleries with aggregate capacity of 800 KL/day and about 151 MW of surplus power.

#### Key risks and concerns

##### 1. Raw material

BHSL has continued its thrust on cane quality promotion and is continually investing in cane variety development. Since last 4 years during the period since 2015-2016 (Oct – Sept), the results of continued investment in Cane development are visible in the form of increased availability of better variety of cane and better Sugar recovery.

Group's average Sugar recovery during the last 4 Sugar Seasons has considerably improved with results as under :-

##### Sugar Season (Oct – Sept)

2014-2015 :	09.41%
2015-2016 :	10.37%
2016-2017 :	10.26%
2017-2018 :	10.72%
2018-2019 :	11.50% (Estimated)

In above, the efforts of the Group are clearly visible towards Cane development and quality promotion and in last 5 years Sugar recovery has improved by almost 22% from the level of 9.41% to estimated level of 11.5% during current year.

It is a matter of pride for BHSL group that during the Sugar Year 2018-2019, Bilai Sugar unit of the Group achieved Sugar recovery of 14.01% which is an all-time high on date Sugar recovery amongst all units on All India basis.

BHSL sees cane development as major thrust area to improve the revenue generation and is continuously striving towards it.

The major area of concern is the ability to make timely cane price payment to farmers given the unremunerative sugar realisations in the domestic market and further exacerbated by the irrationally high cane price fixed by the state government.

##### 2. Sugar price risk

While cane price is fixed by the state government, sugar realisations are totally market driven and are dependent on demand-supply dynamics. This has often led to complete mismatch between the cane price and sugar realisations.

During years of high production leading to excess supply, there will be risk of Sugar Price sliding down. To mitigate the said Sugar price risk, Government had fixed Minimum Selling Price (MSP) of Sugar earlier at level of ₹ 29.0 per Kg and now at level of ₹ 31.0 per Kg below which no Sugar Mill can sell Sugar in the market.

Industry is pushing hard to further increase the said MSP to the level of ₹ 35 – 36 per Kg which is under Government consideration. So, while, there is a Sugar Price risk, during surplus years when such risk becomes acute, there is Government intervention to mitigate this risk.

##### 3. Regulatory risk

Sugar industry is subject to many regulatory risks like environment, raw material pricing, government policies, etc. The biggest risk to the business is the disjointed irrational sugarcane price fixed by the state government.

However, to ensure liquidity and financial health for Industry, both Central & State Government keeps on providing policy and subsidy support to enable Sugar Mills to pay fixed cane price as fixed by the Government.

##### 4. De-risking strategy

As part of our business strategy, we are rapidly de-risking our business with the investment in power generation capacity. This business is non-cyclical and therefore expected to generate steady cash flows year-on-year. Further, sustained ethanol supplies to oil companies has provided some element of risk mitigation.

**Table 9: Market share of BHSL in U.P. and on All India basis for Sugar basis Production**

Particulars	Unit	Year (Oct – Sept)				
		2018-2019 (estimated)	2017-2018	2016-2017	2015-2016	2014-2015
BHSL Production	Million MT	1.83	1.82	1.33	1.05	1.15
UP Production	Million MT	12.00	12.05	8.80	6.84	7.10
All India Production	Million MT	33.00	32.48	20.30	25.13	28.31
BHSL % of UP	%	15.25	15.10	15.11	15.35	16.20
BHSL % of All India	%	5.54	5.60	6.55	4.18	4.06

### Sugar market spread - All units of BHSL

Bajaj Group (Bajaj Hindusthan Sugar Limited) has 14 units evenly spread throughout the State of Uttar Pradesh with 5 sugar mills in Western UP, 5 in Central UP and 4 in Eastern UP.

The Zonewise details and the crushing capacity of the mills are as under:-

**Table 10: Zonewise details of crushing capacity**

Zone	No. of Mills	Crushing Capacity (TCD)
West	5	48000
Central	5	48000
East	4	40000
<b>Total</b>	<b>14</b>	<b>136000</b>

### Markets

**West U.P.:** Sugar produced by our West UP mills is sold in the region of West UP and neighbouring States in Northern India like Punjab, Haryana, Rajasthan and Delhi etc.

This year due to higher Sugar production in state, Sugar is sold to North-East States also like West Bengal, Assam etc. where it is going by rail rakes.

**Central U.P.:** Sugar produced in our Barkhera and Maqsoodapur mills is sold partly in Central U.P. and also in nearby states i.e. Rajasthan, M.P., North-East states and at times to Haryana, Odisha. The sugar produced by Gola, Palia and Khambarkhera mills is sold in Central UP, East UP, Bihar, Bengal, Jharkhand, M.P. and North-East States.

**East U.P.:** Sugar produced by our Eastern UP Mills is sold in the region of Eastern UP and states like Bihar, Jharkhand, West Bengal, Assam and North-East States.

### Competition

Other than the mills in state of UP, we have to face competition mainly from mills in the state of Maharashtra, Karnataka and refinery in West Bengal which currently is not in operation. For movement of sugar to neighbouring states like Punjab, Haryana, Bihar, UP mills face competition from mills in these states, as well. Sugar sales outside of UP is purely on the basis of the price parity with competing mills.

### No competition from Sugar imports

Due to continued surplus sugar production and high stocks, depressed and all-time low International Sugar Prices, Govt. has imposed import duty of 100% restricting Sugar Imports and no major imports has taken place under OGL in last 3 years.

**Table 11: High & Low Price (Realisation) of Sugar - BHSL**

- Refined sugar is not taken into consideration.
- Only M-31 50 Kg rate is taken.
- Sugar despatches through rake is also not considered as the sale confirmed in a month is despatched next month.

## IV. Internal Control System and their Adequacy

The Internal Control system comprises the Control Environment and Control procedures. This includes policies & procedures adopted by the management which helps in achieving their objective of ensuring adherence to Companies policies, safeguarding of its Assets, prevention & timely detection of Frauds, orderly & efficient conduct of its business and preparing reliable financial information. The Internal Audit function should be commensurate with the size of business and the system has to ensure that all the transactions are authorised, recorded and reported correctly.

Your Company has in place an adequate system of Internal Controls, Accounting procedures and policies being monitored by a strong and Independent Internal Audit department. To maintain its objectivity and independence, the Internal Audit function reports to the Chairman of the Audit Committee of the Board. The Company has also in place a well-defined Delegation of Power (DOP) and various Standard Operating Procedures (SOPs) covering different areas which further strengthen the Internal Control. The Audit approach is based on random sample selection and takes into account the generally accepted business practices. Based on reports of Internal Audit department, corrective actions are taken by process owners in their respective areas thereby strengthening the Internal Controls. Significant Audit observations and corrective action thereon are reviewed by management and subsequently placed before the Audit Committee of the Board of Directors along with the action plan recommended by respective functional head. The directions of Audit Committee are implemented by the respective Head of the Departments and action taken reports are placed before the Audit Committee members in next meeting for their review.

## V. Human Resources/Industrial Relations

The industrial relations at the Company's Sugar Mills and Head Office were cordial throughout the year. The Company is committed to create an organisation that nurtures the talent and enterprise of its people, helping them grow and find the fulfilment in an open culture as per our "Group Vision (Think Tomorrow)". The result, that BHSL would be number one. Its growth strategies are based on a strong Human Resource (HR) foundation created through a judicious use of innovative techniques and complementary HR processes and systems. HR policies are reviewed, revised and updated from time to time to make it relevant, more effective and useful to the employees and also to the Company. The basic objective is to facilitate the smooth execution of transparent policies. As of March 31, 2019, BHSL had 7,317 employees. The various HR initiatives carried out by the Company during the year are listed below:

### Training Programmes :-

- **Training & Development** - During the year 2018-19, HR dept. had organised various Training programmes through the involvement of various external agencies as well as internal training faculties. HR department had prepared advance training calendar on six monthly basis scheduling (during off season) various topics after consulting all the departments for the subject and strength of the participants. After preparing, the list of the topics, schedule and name of the participants, it is communicated to everyone concerned by the HR department. On an average 25-28 persons attended such training programme session. The major topics covered by our internal training faculty were on Cane sowing, Irrigation and Pest Control techniques, Operational Procedure and Skill upgradation methods, Safety, Awareness on Health & Occupational Diseases, House-keeping, ISO, Fire fighting, Environment, Health & Occupational Hazards, Energy Conservation, Attitudinal & Behavioural Management, GST, SAP, Computer Awareness, Statutory Compliances, etc. The HR department also arranged external training to the employees by outside experts with specialist knowledge so that the employees can improve their skill sets with relevant up-to-date information and techniques learned in an environment that is familiar and conducive to advancement of group learning also, encourage interaction from the entire group and some surprising techniques can be developed that are particularly relevant to their field. It also helps to grow the team and provides opportunity to interact on a much more personal basis building strongest bonds between team members and more efficient working environment.
- **Induction Programmes for New Employees** - Induction programmes are regularly conducted at unit level as well as in offices by HR department for all the new employees. This is an interactive programme supplemented by powerpoint presentation about the Company.
- **Activities and Events** - As a part of Employees Engagement Programmes, celebrated religious, cultural, national integration programmes, e.g. Annual function of Holi Milan, Shivalya Temple, Janmashtami, Dussehra, Diwali, Teej, Lohri festival & New Year celebrations, Republic Day, Independence Day, Vishwakarma Day, Environment Day, Safety Week (4 March to 10 March), Jamnalal Jayanti (4th Nov.), Labour Day (1st May), Zonal Cricket Tournament various type of children's events like Drawing Competition, Fancy Dress Competition, Annual Picnic & Excursion Tours etc.

### Corporate Social Responsibility

- 3. Does the Company have procedures in place for sustainable sourcing (including transportation)? If yes, what percentage of your inputs was sourced sustainably? Also, provide details thereof, in about 50 words or so.**

During crushing season, the Cane Indent has been given to the cane societies keeping in mind the per day cane availability, according to this transport and labour arrangement has been made for the day-to-day cane lifting of centres and also to avoid the stale cane. This system also helps us in the transport and labour cost saving.

- 4. Has the Company taken any steps to procure goods and services from local and small producers, including communities surrounding their place of work? If yes, what steps have been taken to improve their capacity and capability of local and small vendors?**

Every year, Bajaj Hindusthan Sugar Ltd. conducts a survey of its command area to bring on record the cane cultivated area of the farmers. This also takes care of the different varieties of sugarcane that are grown by farmers.

Post this massive exercise, every farmer within the command area of the mill is provided with a calendar, which tells him when he can expect a Mill Supply Ticket (Purchy) against which he will supply the cane.

The calendar is distributed over 180 days. Based on the maturity and recovery expected from the varieties, the distribution takes place in the calendar.

After receiving the purchy, the farmer harvests the cane and transports it either in a bullock cart or tractor trolley to the mill gate. Farmers who stay in far-flung areas supply cane at the mill's centres. This cane is then transported in trucks or through rail to the mill.

# Independent Auditor's Report

## To the Members of Bajaj Hindusthan Sugar Limited

### Report on the Audit of the Standalone Financial Statements

#### Qualified Opinion

1. We have audited the Standalone financial statements of Bajaj Hindusthan Sugar Limited ("the Company"), which comprise the balance sheet as at March 31, 2019, the statement of Profit and Loss including the statement of other comprehensive income, the cash flow statement, the Statement of Changes in Equity for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report, the aforesaid standalone Ind AS financial statements give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2019 and its loss, changes in equity and its cash flows for the year ended on that date.

#### Basis for Qualified Opinion

2. We draw attention to Note No. 36 (e) regarding the non-provision of premium payable on Optionally Convertible Debentures (OCDs) at the time of redemption of OCDs issued to lenders pursuant to the Scheme for Sustainable Structuring of Stressed Assets (S4A Scheme) which stipulates that the yield to maturity (YTM) being the difference between weighted average interest and coupon rate payable as redemption premium at the time of redemption of OCDs redeemable in 13 equal instalments commencing from the Financial year 2024-25. The Company considers such YTM / redemption premium as contingent liability and has not provided for the same in the books of account for the year ended March 2019 amounting to ₹ 403.63 crore. The aggregate liability for such YTM from the date of allotment of OCDs till year ended March 31, 2019 is ₹ 514.50 crore from date of allotment of OCDs. Had such interest been provided, the reported profit / (loss) for the year ended March 2019 would have been ₹ (467.71) crore and Net worth of the Company would have been ₹ 2,890.55 crore.

#### Material Uncertainty related to Going Concern

3. As stated in Note No.47 of the financial statements, the Company continues to incur losses resulting into reduction of net worth. As at the year end, the Company has overdue instalments of certain debts and dues payable to farmers for sugar cane purchases. The above factors indicate a material uncertainty, which may cast significant doubt about the Company's ability to continue as a going concern. However, the management expects to generate positive cash flow from operation this year based on improvement in sugar recovery percentage & expects further improvement in the operational efficiencies in other parameters based on various corrective measures taken by the Company including the restructuring of debts as stated in the said note and the Company expects to receive benefits under the Sugar Promotion Policy 2004 pursuant to a favourable Order of Hon'ble Supreme Court of India. Accordingly, the Company is of the view that going concern of the accounting is appropriate.

Our report is not modified in respect of the above matter.

#### Emphasis of Matter

4. As stated in Note No.45, the Company has exposure aggregating to ₹ 1,748.35 crore, in its three wholly-owned subsidiaries, ₹ 770.13 crore in other companies which are related to group and ₹ 511.86 crore in other companies, aggregating to ₹ 3,030.34 crore, by way of investments, loans, accumulated interest on these loans and receivables. The above exposure is considered good and recoverable by the management based on the future projections, valuation reports, ongoing efforts for obligation casted on the Company and promoters to recover the outstanding loans in phased manner in terms of the agreements executed to give effect to the debt restructuring schemes from time to time and accordingly no provision has been considered necessary.

Our report is not modified in respect of the above matter.

#### Key Audit Matters

5. Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined the matters described below to be key audit matters to be communicated in our report.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the standalone financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the standalone financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying standalone financial statements.

#### **Impairment assessment for Investments, loans and interest on loan & receivables**

(refer Note No. 2.20 (i) for accounting policy and Note No. 45 for Investments)

The Company has exposure aggregating to ₹ 1,748.35 crore, in its three wholly-owned subsidiaries, ₹ 770.13 crore in other companies which are related to group and ₹ 511.86 crore in other companies, by way of investments, loans, accumulated interest on these loans and receivables. Such investments are carried at cost as per Ind AS 27 – Separate Financial Statements and are individually assessed for impairment as per Ind AS 36 - Impairment of Assets.

We focussed on this area due to magnitude of the carrying value of investments, loans, accumulated interest on loan and receivables related to subsidiary companies, other companies related to group and other companies, which comprise 21% of the total assets as at March 31, 2019 and are subject to annual impairment assessment.

Our audit procedures, in respect of testing impairment assessment in case of investments, loans given, interest accrued on loans and receivables related to subsidiary companies, other companies related to group and other Companies, included the following:

- a. Obtained understanding of the process, evaluated the effectiveness of controls in respect of impairment assessment of investments in subsidiaries and other companies related to group.
- b. Held discussions with management regarding appropriate implementation of policy on impairment.
- c. Evaluated the future projections and valuation report of the other companies related to group.
- d. Confirmations for above exposure.
- e. Validated the S4A Restructuring Scheme.
- f. We evaluated the impairment assessment performed by management taking into account the requirements of Ind AS 36 – Impairment of Assets.

### **Information Other than the Standalone Financial Statements and Auditor's Report Thereon**

6. The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in Board's Report including Annexures to Board's Report, Corporate Governance and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### **Responsibility of Management and Those Charged with Governance for the Standalone Financial Statements**

7. The Company's Board of Directors / Management is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as

a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

## **Auditor's Responsibilities for the Audit of the Financial Statements**

8. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- a. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- b. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- c. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- d. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- e. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## **Report on Other Legal and Regulatory Requirements**

9. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Companies Act, 2013, we give in the Annexure A statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
10. As required by Section 143(3) of the Act, we report that:

- a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- b. Except for the possible effects of the matters described in the Basis of Qualified opinion paragraph above, in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- c. The Balance Sheet, the Statement of Profit and Loss, and the Statement of Cash Flows and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
- d. In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended except requirement of Ind AS 23 on Borrowings Cost with regard to matters described in the Basis of Qualified Opinion paragraph above .
- e. The going concern matter described in paragraph 3 under Material Uncertainty related to Going Concern paragraph above, in our opinion, may have adverse effect on the functioning of the Company.
- f. On the basis of the written representations received from the directors as on March 31, 2019 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2019 from being appointed as a director in terms of Section 164 (2) of the Act.
- g. With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".
- h. With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of Section 197(16) of the Act, as amended.

In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of Section 197 of the Act.

- i. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
  - i. The Company has disclosed the impact of pending litigations on its financial position in its financial statements – Refer Note 36 to the financial statements;
  - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses; and
  - iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

## **Annexure "A" referred to in paragraph 11 under the heading Report on other legal and regulatory requirements of our report of even date**

- i. In respect of its Fixed Assets :
  - a. The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets on the basis of available information.
  - b. As explained to us, all the fixed assets have been physically verified by the management in a phased periodical manner, which in our opinion is reasonable, having regard to the size of the Company and nature of its assets. No material discrepancies were noticed on such physical verification.
  - c. According to the information and explanations given to us, the immovable properties of the Company have been mortgaged with the lenders and the original title deeds are deposited with the lender's trustee. Based on the confirmation given by the trustee and verification of the copies of the title deeds / lease deeds in respect of immovable properties of freehold land, buildings and immovable properties of land that have been taken on

lease and disclosed as fixed assets in the financial statement are held in the Company's name or in the Company's erstwhile name or in the name of companies amalgamated with the Company in past.

ii. In respect of its inventories:

As explained to us, physical verification of inventories have been conducted at reasonable intervals by the management, which in our opinion is reasonable, having regard to the size of the Company and nature of its inventories. No material discrepancies noticed on such verification of inventories as compared to the book records.

iii. On the basis of the audit procedures applied by us, and according to the information and explanations given to us on our enquiries on this behalf and records produced to us for our verification, the Company has not given loans and advances to Companies covered in the register maintained under Section 189 of the Act.

iv. In respect of loans, investments, guarantees and security, the Company has complied with the provisions of Sections 185 and 186 of the Act except in respect of one subsidiary wherein no interest is charged by the Company.

v. According to the information and explanations given to us, the Company has not accepted any deposits within the meaning of provisions of Sections 73 to 76 or any other relevant provisions of the Act and the rules framed thereunder. Therefore, the provisions of Clause (v) of paragraph 3 of the Order are not applicable to the Company.

vi. To the best of our knowledge and as explained, the Company has maintained the cost records specified under Companies (cost records and audit) Rules, 2014 issued under sub section (1) of Section 148 of the Act, in respect of Company's products to which said rules are made applicable and are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. We have, however, not made a detailed examination of the records with a view to determine whether they are accurate.

vii. In respect of Statutory dues :

- According to the records of the Company, undisputed statutory dues including Goods and Services Tax, Provident Fund, Income-Tax, Sales-Tax, Service Tax, Duty of Customs, Duty of Excise, Value Added Tax, Cess and any other statutory dues applicable to it have been generally regularly deposited with appropriate authorities. ## **ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT**

(Referred to in paragraph 12(g) under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of Bajaj Hindusthan Sugar Limited of even date)

### **Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls over financial reporting of **BAJAJ HINDUSTHAN SUGAR LIMITED** ("the Company") as of March 31, 2019 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

### **Management's Responsibility for Internal Financial Controls**

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### **Auditor's Responsibility**

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial

reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company.

### **Meaning of Internal Financial Controls Over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

### **Limitations of Internal Financial Controls Over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Opinion**

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The Company is engaged in the manufacture of sugar, alcohol and generation of power.

The Standalone financial statements of the Company are for the year ended March 31, 2019 and are prepared in Indian Rupees being the functional currency. The values in Indian Rupees are rounded to crore, except otherwise indicated.

### 2 Accounting policies

#### 2.01 Basis of preparation and presentation

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) under the historical cost convention on the accrual basis except for :

- i. Certain financial assets and liabilities measured at fair value,
- ii. Defined benefit plans - plan assets measured at fair value.

The financial statements of the Company have been prepared to comply with the Indian Accounting Standards ('Ind AS') notified under Companies (Indian Accounting Standards) Rules, 2015 read with Section 133 of the Companies Act, 2013.

#### 2.02 Standard issued but not yet effective

- i) Ind AS 116 Leases : On March 30, 2019, Ministry of Corporate Affairs has notified Ind AS 116, Leases. Ind AS 116 will replace the existing leases Standard, Ind AS 17 Leases, and related Interpretations. The Standard sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e., the lessee and the lessor. Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than twelve months, unless the underlying asset is of low value. Currently, operating lease expenses are charged to the statement of profit & loss. The Standard also contains enhanced disclosure requirements for lessees. Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17.

The effective date for adoption of Ind AS 116 is annual periods beginning on or after April 1, 2019. The standard permits two possible methods of transition:

- Full retrospective – Retrospectively to each prior period presented applying Ind AS 8 Accounting Policies, Changes in Accounting Estimates and Errors
- Modified retrospective – Retrospectively, with the cumulative effect of initially applying the Standard recognised at the date of initial application.

Under modified retrospective approach, the lessee records the lease liability as the present value of the remaining lease payments, discounted at the incremental borrowing rate and the right of use asset either as:

- (a) Its carrying amount as if the standard had been applied since the commencement date, but discounted at lessee's incremental borrowing rate at the date of initial application, or
- (b) An amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments related to that lease recognised under Ind AS 17 immediately before the date of initial application.

Certain practical expedients are available under both the methods.

On completion of evaluation of the effect of adoption of Ind AS 116, the Company is proposing to use the 'Modified Retrospective Approach' for transitioning to Ind AS 116, and take the cumulative adjustment to retained earnings, on the date of initial application (April 1, 2019). Accordingly, comparatives for the year ended March 31, 2019 will not be retrospectively adjusted. The Company has elected certain available practical expedients on transition.

- ii) **Ind AS 12 Appendix C, Uncertainty over Income Tax Treatments** : On March 30, 2019, Ministry of Corporate Affairs has notified Ind AS 12 Appendix C, Uncertainty over Income Tax Treatments which is to be applied while performing the determination of taxable profit (or loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under Ind AS 12. According to the appendix, companies need to determine the probability of the relevant tax authority accepting each tax treatment, or group of tax treatments, that the companies have used or plan to use in their income tax filing which has to be considered to compute the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.

The standard permits two possible methods of transition - i) Full retrospective approach – Under this approach, Appendix C will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors, without using hindsight and ii) Retrospectively with cumulative effect of initially applying Appendix C recognised by adjusting equity on initial application, without adjusting comparatives.

The effective date for adoption of Ind AS 12 Appendix C is annual periods beginning on or after April 1, 2019. The Company will adopt the standard on April 1, 2019 and has decided to adjust the cumulative effect in equity on the date of initial application i.e. April 1, 2019 without adjusting comparatives.

The effect on adoption of Ind AS 12 Appendix C would be insignificant in the standalone financial statements. Amendment to Ind AS 12 – Income taxes : On March 30, 2019, Ministry of Corporate Affairs issued amendments to the guidance in Ind AS 12, 'Income Taxes', in connection with accounting for dividend distribution taxes.

The amendment clarifies that an entity shall recognise the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events.

Effective date for application of this amendment is annual period beginning on or after April 1, 2019. The Company is currently evaluating the effect of this amendment on the standalone financial statements.

- iii) Amendment to Ind AS 19 – Plan amendment, curtailment or settlement – On March 30, 2019, Ministry of Corporate Affairs issued amendments to Ind AS 19, 'Employee Benefits', in connection with accounting for plan amendments, curtailments and settlements.

"The amendments require an entity:

to use updated assumptions to determine current service cost and net interest for the remainder of the period after a plan amendment, curtailment or settlement; and to recognise in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the impact of the asset ceiling."

Effective date for application of this amendment is annual period beginning on or after April 1, 2019. The Company does not have any impact on account of this amendment.

## Summary of significant accounting policies

### 2.03 Current and non-current classification

The Company presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is treated as current when it is:

- i) expected to be realised or intended to be sold or consumed in normal operating cycle;
- ii) held primarily for the purpose of trading;
- iii) expected to be realised within twelve months after the reporting period;
- iv) cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period; or
- v) carrying current portion of non-current financial assets.

All other assets are classified as non-current.

A liability is current when:

- i) it is expected to be settled in normal operating cycle;
- ii) it is held primarily for the purpose of trading;
- iii) it is due to be settled within twelve months after the reporting period;
- iv) there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period; or
- v) it includes current portion of non-current financial liabilities.

All other liabilities are classified as non-current.

### 2.04 Operating cycle

All assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle and other criteria set out above which are in accordance with Schedule III to the Act. Based on the nature of services and time between the acquisition of assets for providing of services and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current / non-current classification of assets and liabilities.

## 2.05 Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes purchase price, taxes and duties, labour cost and direct overheads for self-constructed assets and other direct costs incurred up to the date the asset is ready for its intended use. In case of land, Company has opted to state fair value as deemed cost on date of transition to Ind AS. When significant parts of property, plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major refurbishment is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in statement of profit and loss as incurred.

Expenditure during construction period incurred on the projects under implementation are treated as pre-operative expenses pending allocation to the assets, and are included under "Work-in-Progress". These expenses are apportioned to fixed assets on commencement of commercial production. Capital Work-in-Progress is stated at the amount incurred up to the date of Balance Sheet.

Depreciation on property, plant and equipment is provided on straight line method and based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013 except, leasehold and improvements which are amortised over the lower of estimated useful life or lease period; on assets acquired under finance lease depreciation is provided over the lease term. Depreciation on assets added, sold or discarded during the year is provided on pro rata basis.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate. Gains or losses arising from de-recognition of a property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is de-recognised.

## 2.06 Leases

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease. Assets acquired under leases other than finance leases are classified as operating leases. The total lease rentals (including scheduled rental increases) in respect of an asset taken on operating lease are charged to the statement of profit and loss on a straight line basis over the lease term unless another systematic basis is more representative of the time pattern of the benefit. Initial direct costs incurred specifically for an operating lease are deferred and charged to the statement of profit and loss over the lease term. Assets given by the Company under operating lease are included in fixed assets. Lease income from operating leases is recognised in the statement of profit and loss on a straight line basis over the lease term unless another systematic basis is more representative of the time pattern in which benefit derived from the leased asset is determined. Costs, including depreciation, incurred in earning the lease income are recognised as expenses. Initial direct costs incurred specifically for an operating lease are deferred and recognised in the statement of profit and loss over the lease term in proportion to the recognition of lease income.

## 2.07 Intangible assets

Intangible Assets are stated at cost of acquisition net of recoverable taxes less accumulated amortisation/depletion and impairment loss, if any. The cost comprises purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for the intended use.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

Computer software are amortised over a period of 5 years. The amortisation period and the amortisation method for intangible assets with a finite useful life are reviewed at each reporting date.

## 2.08 Research & Development Expenditure

Revenue expenditure on Research is expensed out in the statement of profit and loss for the year. Development costs of products are charged to the statement of profit and loss unless a product's technological and commercial feasibility has been established, in which case such expenditure is capitalised. Capital expenditure on research and development is shown as an addition to fixed assets.

## 2.09 Borrowing Cost

Borrowing costs include exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are directly attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are charged to the profit and loss statement in the period in which they are incurred.

## 2.10 Inventories

- i) Stock of raw materials is valued at cost or net realisable value whichever is lower. Cost is arrived at on FIFO Basis.
- ii) Stock of materials-in-process and finished goods are valued at cost or net realisable value whichever is lower.
- iii) Stores, spares and packing material are valued at cost. Cost is arrived at on Weighted Average Basis.
- iv) Obsolete stores and spares when identified and technically determined, are valued at estimated realisable value.
- v) By-products - Molasses and bagasse has been valued at estimated realisable value.
- vi) Trial run inventories are valued at cost or estimated realisable value whichever is lower.

## 2.11 Earnings per share

Basic EPS is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted EPS is computed using the weighted average number of equity and dilutive equity equivalent shares outstanding during the year.

## 2.12 Impairment of non-financial assets

The carrying amount of any property, plant and equipment and intangible assets with finite lives are reviewed at each balance sheet date, if there is any indication of impairment based on internal / external factors. An asset is impaired when the carrying amount of the asset exceeds the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. An impairment loss is charged to the statement of profit and loss in the year in which an asset is identified as impaired. An impairment loss recognised in prior accounting periods is reversed if there has been change in the estimate of the recoverable amount. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

## 2.13 Provisions, contingent liabilities and contingent assets

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

## 2.14 Employee benefits

- i) Short-term employee benefits:

Short-term employee benefits are recognised as expenditure at the undiscounted value in the statement of profit and loss of the year in which the related service is rendered.

- ii) Post-employment benefits :

Defined contribution plans: Company's contribution to the superannuation scheme, provident fund scheme and pension under employees' pension scheme etc. are recognised during the year in which the related service is rendered. Monthly contributions are made to a trust administered by the Company. The interest rate payable by the trust to the beneficiaries is notified by the Government. The Company has an obligation to make good the shortfall, if any, between the return on the investments of the trust and the notified interest rate.

Defined benefit plans - gratuity: Gratuity liability is covered under the gratuity-cum-insurance policy of Life Insurance Corporation of India (LIC) administered by trust. The present value of the obligation is determined based on an actuarial valuation, using the projected unit credit method. Actuarial gains and losses in respect of post-employment and other long-term benefits are charged to the Other Comprehensive Income. The amount funded by the trust administered by the Company under the aforesaid Policy, is reduced from the gross obligation under the defined benefit plan, to recognise the obligation on a net basis.

- iii) Long-term compensated absences are provided on the basis of actuarial valuation.
- iv) Compensation to employees under Voluntary Retirement Scheme is charged to statement of profit and loss account in the year of accrual.

## 2.15 Taxation

- i) Provision for current tax is made with reference to taxable income computed for the accounting period for which the financial statements are prepared by applying the tax rates and laws that are enacted or substantively enacted at the Balance sheet date. The tax is recognised in statement of profit and loss, except to the extent that it relates to items recognised in the other comprehensive income (OCI) or in other equity. In this case, the tax is also recognised in other comprehensive income and other equity.

- ii) Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of deferred tax liabilities and assets are reviewed at the end of each reporting period. Deferred tax asset on unabsorbed depreciation and carried forward losses is recognised only to the extent of deferred tax liability.
- iii) Credit of MAT is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the MAT credit becomes eligible to be recognised as an asset, the said asset is created by way of a credit to the statement of profit and loss account and shown as MAT credit entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income tax during the specified period.

## 2.16 Cash and cash equivalents

Cash and cash equivalents includes cash in hand and deposits with any qualifying financial institution repayable on demand or maturing within three months from the date of acquisition and which are subject to an insignificant risk of change in value.

## 2.17 Foreign currencies

- i) Foreign currency transactions are recorded at the rates of exchange prevailing on the date of transaction. Monetary foreign currency assets and liabilities outstanding at the close of the financial year are revalued at the exchange rates prevailing on the balance sheet date. Exchange differences arising on account of fluctuation in the rate of exchange is recognised in the statement of profit and loss. However, in respect of long-term foreign currency monetary items taken prior to April 1, 2015 being the date of transition to Ind AS, the exchange difference relating to acquisition of capital assets, has been adjusted to the capital assets.
- ii) Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or statement of profit and loss are also recognised in OCI or statement of profit and loss, respectively).

## 2.18 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment, including excise duty and excluding taxes or duties collected on behalf of the government (other than excise duty).

Revenue is recognised only if following condition are satisfied:

- The Company has transferred risks and rewards incidental to ownership to the customer;
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- It is probable that the economic benefit associated with the transaction will flow to the Company; and
- It can be reliably measured and it is reasonable to expect ultimate collection.

The revenue from sale of renewable energy certificates (REC) recognised in the year of sale.

Export incentives accrued under foreign trade policy are accounted for in the year of export.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Dividend income is recognised when the right to receive payment is established.

## 2.19 Government grants

The Government grants such as capital subsidies under Sugar Promotion Policy, 2004, interest free or concessional interest rate loans and subsidies related to sugar cane purchased are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When

the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed.

When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Company receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to statement of profit and loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to the financial liabilities.

## 2.20 Financial Instruments

### i) Financial assets

#### A Initial recognition

The Company classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement. Financial instruments are recognised when the group becomes a party to the contractual provisions of the instrument. Financial instruments are recognised initially at fair value plus transactions costs that are directly attributable to the acquisition or issue of the financial instrument, except for financial assets at fair value through statement of profit and loss, which are initially measured at fair value, excluding transaction costs (which is recognised in statement of profit and loss).

#### B Subsequent measurement

##### a) Financial assets carried at amortised cost (AC)

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

##### b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

##### c) Financial assets at fair value through statement of profit and loss (FVTPL) Equity instruments

All equity investments in scope of Ind AS 109 are measured at fair value either as at FVTOCI or FVTPL. The Company makes such election on instrument-by-instrument basis.

For equity instruments measured as at FVTOCI, all fair value changes on the instrument, excluding dividends, are recognised in the OCI. Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the P&L.

#### Investment in subsidiaries and associates

Investment in subsidiaries and associates are carried at cost

#### Treasury shares

The Company has created a Securities Trust that holds the equity shares of the Company, which were allotted to the Trust in 2010 pursuant to the Scheme of amalgamation of its erstwhile subsidiary Bajaj Hindusthan Sugar and Industries Ltd. The Company uses Trust as a separate vehicle under the said scheme and treats as its extension and shares held by Trust are treated as treasury shares. The own equity shares that reacquired (treasury shares) are recognised at cost and deducted from equity. No gain or loss is recognised in statement of profit and loss on the purchase, sale, issue or cancellation of the Company's own equity shares. Corresponding amount of security premium is reduced from other equity.

##### d) Impairment of financial assets

The Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

1. Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance

2. Financial assets that are debt instruments and are measured as at FVTOCI
3. Lease receivables
4. Trade receivables or any contractual right to receive cash or another financial asset
5. Loan commitments which are not measured as at FVTPL
6. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables; and all lease receivables.

The application of simplified approach does not require the Company to track changes in credit risk rather; it recognises impairment loss allowance based on 12 months ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

## **ii) Financial liabilities**

### **A Initial recognition and measurement**

All financial liabilities are recognised initially at fair value and in case of loans and borrowings and payables, net of directly attributable cost. Fees of recurring nature are directly recognised in statement of profit and loss as finance cost.

### **B Subsequent measurement**

Financial liabilities are subsequently carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

#### **a) Loans and borrowings**

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in statement of profit and loss when liabilities are derecognised. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance cost in the statement of profit and loss.

#### **b) Compound financial instruments**

At the issue date the, fair value of the liability component of a compound instrument is estimated using the market interest rate for a similar non-convertible instrument. This amount is recorded as a liability at amortised cost using the effective interest method until extinguished upon conversion or at the instrument's redemption date. The equity component is determined as the difference of the amount of the liability component from the fair value of the instrument. This is recognised in equity, net of income tax effects, and is not subsequently re-measured.

## **iii) De-recognition of financial instruments**

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognised from the Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

## **iv) Fair value of financial instruments**

In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value include discounted cash flow analysis, available quoted market prices. All methods of assessing fair value result in general approximation of value, and such value may vary from actual realisation on future date.

## **v) Derivative financial instruments**

Derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial

assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss, except for the effective portion of cash flow hedges which is recognised in Other Comprehensive Income and later to statement of profit or loss when the hedge item effects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial assets or non-financial liability.

## **2.21 Non-current assets held for sale / distribution to owners and discontinued operations**

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less cost to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt from this requirement.

An impairment loss is recognised for any initial or subsequent write-down of the assets (or disposal group) to fair value less cost to sell. A gain is recognised for any subsequent increases in fair value less cost to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

Non-current assets (including that are part of a disposal group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit and loss.

## **2.22 Critical estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below:

### **i) Depreciation and useful lives of property, plant and equipment**

Property, plant and equipment are depreciated over the estimated useful lives of the assets, after taking into account their estimated residual value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological changes. The depreciation for future periods is adjusted if there are significant changes from previous estimates.

### **ii) Recoverability of trade receivable**

Judgements are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

### **iii) Provisions**

Provisions and liabilities are recognised in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgement to existing facts and circumstances, which can be subject to change. Since the cash outflows can take place many years in the future, the carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances.

### **iv) Impairment of non-financial assets**

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where

the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transaction are taken into account, if no such transactions can be identified, an appropriate valuation model is used.

**v) Impairment of financial assets**

The impairment provisions for financial assets are based on assumptions about risk of default and expected cash loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward-looking estimates at the end of each reporting period.

**vi) Fair value measurement of financial instruments**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

**vii) Recognition of Minimum Alternative Tax (MAT) as an asset**

Minimum Alternative Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period; in the year in which the MAT credit becomes eligible to be recognised as an asset. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income tax during the specified period.

**viii) Material uncertainty about going concern**

In preparing financial statements, management has made an assessment of Company's ability to continue as a going concern. Financial statements are prepared on a going concern basis. The Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern. Further details on going concern are disclosed in Note No.47

This is a defined benefit plan and statutory liability of the Company. The Company has to pay the Gratuity to the employees as per the provisions of The Payment of Gratuity Act 1972 irrespective of the availability of the funds with the Gratuity Fund.

The Gratuity Liability is computed on actuarial valuation basis done at year end using the Project Unit Credit Method is provided for in the books of account and is based on a detailed working done by a certified Actuary. Past service cost is recognised immediately to the extent that the benefits are already vested.

The estimates of rate of escalation in salary considered in actuarial valuation, take into account inflation, seniority, promotion and other relevant factors including supply and demand in the employment market. The above information is certified by the actuary.

Company manages Gratuity obligation through Trust. Company arranges the fund based on the actuarial valuation and requirement of the Trust.

The expected contributions for Defined Benefit Plan for the next financial year will be in line with FY 2018-19.

These gratuity plan typically expose the Company to actuarial risks such as: investment risk, interest risk, longevity risk and salary risk.

#### **Investment risk**

The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds. For other defined benefit plans, the discount rate is determined by reference to market yield at the end of reporting period on high quality corporate bonds when there is a deep market for such bonds; if the return on plan asset is below this rate, it will create a plan deficit.

#### **Interest risk**

A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan debt investments.

#### **Longevity risk**

The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

#### **Salary risk**

The present value of the defined plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

(e) Pursuant to the scheme for sustainable structuring of stressed assets (S4A Scheme) for restructuring of certain outstanding debts of the Company [Refer Note No. 41 (d) for details], the Company has allotted optionally convertible debentures (OCDs) aggregating to ₹ 3,483.25 crore to JLF lenders. The OCDs carry a yield to maturity (YTM) at the agreed Yield Rate accruing on an annual basis, starting from the Allotment Date. The said YTM is payable as premium on redemption along with the relevant Principal Amount on each Redemption Date [ Refer Note no. 17.1]. The OCDs provide the lenders an option to exercise the right to convert the outstanding OCDs into equity shares of the Company at a price in accordance with Applicable Law (including the ICDR Regulations). Since premium to be paid is contingent on the occurrence of the event of redemption of OCDs, the YTM of ₹ 514.50 crore from the date of allotment of OCD till the year end is treated as contingent liability and would be accounted for as finance cost at the time of redemption of respective OCDs.

(a promoter group company) and pledge of entire shares held by the promoters of the Company.
  - 9 The transactions with related parties are made on terms equivalent to those that prevail in arm's-length transactions. Outstanding balances year-end are unsecured except as stated above and settlement occurs in cash.
- 41** a) At the request of the Company, the Joint Lenders' forum (JLF Lenders) led by State Bank of India has approved the corrective action plan for restructuring of credit facilities on December 03, 2014 under JLF route in accordance with the applicable framework and guidelines issued by Reserve Bank of India. Accordingly, a Master Restructuring Agreement (MRA) has been signed on December 30, 2014 among the Company and JLF lenders, by virtue of which the restructured facilities are governed by the provisions specified in the said MRA. The cut-off date for restructuring under JLF route is July 31, 2014.
- b) The MRA as well as guidelines of Reserve Bank of India issued on debt restructuring under JLF route give a right to the JLF lenders to get recompense of their waivers and sacrifices made as per corrective action plan. The recompense payable by the Company is contingent on various factors including improved performance of the Company and many other conditions, the outcome of which currently is materially uncertain and hence the proportionate amount payable as recompense is treated as a contingent liability. The aggregate present value of recompense till March 31, 2019 payable to the JLF lenders as per MRA is approximately ₹189.21 crore for the Company.

- c) As per terms of above restructuring approved by lenders, the Promoters were required to bring promoter contribution amounting to ₹ 200 crore in phased manner till September 2015 in the form of equity capital/preference capital/unsecured loan/other similar instruments. An amount of ₹ 200 crore has been brought by promoters as unsecured loan within stipulated period.
- d) For restructuring of certain outstanding debts of the Company, the Joint Lenders' forum (JLF) of the Company adopted the scheme for sustainable structuring of stressed assets (S4A Scheme) with reference date as June 23, 2017, which was approved by the overseeing committee (OC) on November 30, 2017. As per the S4A Scheme, the total fund based debt of ₹ 8,284.59 crore (including funded interest of ₹ 354.51 crore), were bifurcated in two parts – 57.81% as Part A (Sustainable Debt) amounting to ₹ 4,789.34 crore to be serviced as per existing terms and conditions of these debts and remainder 42.19% as Part B (Unsustainable Debt) amounting to ₹ 3,495.25 crore. While a sum of ₹ 12.00 crore has been adjusted against the consideration payable to Promoters towards transfer of 11,99,87,344 equity shares, at a price of ₹ 1/- per equity share, to JLF lenders and the balance ₹ 3,483.25 crore has been converted into optionally convertible debentures allotted to the JLF lenders.
- Promoter / Promoters' group has transferred 11,99,87,344 (10.59%) equity shares, at ₹ 1/- per equity share, to JLF lenders, resulting in reduction of Promoter holding from 26.02% to 15.43% in accordance with the S4A Scheme.
- e) "Finance Cost" includes a sum of ₹ 354.51 crore during FY 2017-18, which instead of being paid in cash have been converted into OCDs as a part of "Unsustainable Debt" in accordance with the S4A Scheme, resulting into substantial savings of cash outflow during the year. The OCDs are redeemable by paying the Principal Amount together with YTM accrued till the date of respective redemption date in 13 equal annual instalments, commencing at the end of FY 2024-25.

**43 Financial Risk Management**

The Company's activities expose it to credit risk, liquidity risk and market risk. This note explains the sources of risks which the entity is exposed to and how it mitigates that risk.

**A Credit risk**

Credit risk arises from the possibility that counterparty may not be able to settle their obligations as agreed. Company is exposed to credit risk from trade receivables and deposits with banks. To manage this, Company periodically assesses the financial reliability of customers, taking into account loan given factors such as credit track record in the market and past dealings with the Company for extension of credit to customers. Company monitors the payment track record of the customers. Outstanding customer receivables are regularly monitored. Concentrations of credit risk are limited as a result of the Company's large and diverse customer base. Company has also taken advances and security deposits from its customers / agents, which mitigate the credit risk to an extent. The ageing of trade receivable is given below:

	Up to 6 months ₹ Crore	More than 6 months ₹ Crore	Total
<b>As at March 31, 2019</b>	<b>193.41</b>	<b>46.94</b>	<b>240.35</b>

Company considers factors such as track record, size of the institution, market reputation and service standards to select the comparative banks with which loan / term deposits are maintained. Generally, term deposits are maintained with banks with which Company has also availed borrowings.

## B Liquidity risk

Liquidity risk is the risk that a company may encounter difficulties in meeting its obligations associated with financial liabilities that are settled by delivering cash or other financial assets. The Group monitors rolling forecasts of its liquidity requirements to ensure it has sufficient cash to meet operational needs. The table below provides undiscounted cash flows towards financial liabilities into relevant maturity based on the remaining period at the balance sheet to the contractual maturity date.

## C Market risk

The Company is exposed to the risk of movements in interest rates, inventory price and foreign currency exchange rates that affects its assets, liabilities and future transactions.

### i) Interest rate risk

Fluctuation in fair value or future cash flows of a financial instrument because of changes in market interest rates gives rise to interest rate risk. Almost 100% of the Company's borrowings are linked to SBI base rate of the banks. With all other variables held constant, the following table demonstrates the impact of change in interest rate on borrowing cost on floating rate portion of loans.

₹ Crore

Interest rate sensitivity	Increase / Decrease in basis point	Effect on Profit before tax	
<b>For year ended March 31, 2019</b>	<b>100</b>	<b>+ / (-)</b>	<b>60.22</b>
For year ended March 31, 2018	100	+ / (-)	67.91

### ii) Inventory price risk

The Company is exposed to the movement in price of principal finished product i.e. sugar. Prices of the sugar cane is fixed by government. Generally, sugar production is carried out during sugar cane harvesting period from November to April. Sugar is sold throughout the year which exposes the sugar inventory to the movement in the price. Company monitors the sugar prices on daily basis and formulates the sales strategy to achieve maximum realisation. The sensitivity analysis of the change in sugar price on the inventory as at year end, other factors remaining constant is given in table below:

₹ Crore

Interest rate sensitivity	Increase / Decrease in sale price	Effect on Profit before tax	
<b>For year ended March 31, 2019</b>	<b>₹ 1</b>	<b>+ / (-)</b>	<b>0.81</b>
For year ended March 31, 2018	₹ 1	+ / (-)	0.85

### iii) Foreign exchange risk

Foreign currency risk arises commercial transactions that recognised assets and liabilities denominated in a currency that is not Company's functional currency (INR). The Company is not exposed to significant foreign exchange risk at the respective reporting dates.

#### 44 Fair value of financial assets and financial liabilities

Financial instruments measured at fair value can be divided into three levels for determining and disclosing the fair value of financial instruments by valuation technique.

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);

Level 3 – Inputs for the asset or liability that are not based on observable market data.

Following methods and assumptions are used to estimate the fair values:

- Fair value of cash and short-term deposits, trade and other short-term receivables, trade payables, other current liabilities and short-term borrowings carried at amortised cost is not materially different from its carrying cost largely due to short-term maturities of these financial assets and liabilities.
- Financial instruments with fixed and variable interest rate fall within level 2 of the fair value hierarchy and are evaluated by Company based on parameters such as interest rate, credit rating or assessed creditworthiness.
- Non-listed shares and other securities fall within level 3 of the fair value hierarchy. Valuation is based on the net asset method.
- Fair value of the borrowing items fall within level 2 of the fair value hierarchy and is calculated on the basis of discounted future cash flows.

Set out below is a comparison by class of the carrying amounts and fair value of the Company's financial instruments that are recognised in the financial statements.

- 45 The Company has non-current investments (long-term investments) aggregating to ₹ 97.34 crore in subsidiaries and current investment in a group company of ₹ 770.13 crore, loans and advances along with accrued interest of ₹ 1,634.72 crore and trade receivables of ₹ 16.29 crore recoverable from subsidiary and loans & advances of ₹ 511.86 crore from other company. Some of these subsidiaries and other companies have accumulated losses and/or negative net worth and/or current liabilities exceeding their respective current assets, as at the respective balance sheet dates. Management has evaluated this matter and is of the firm view that sufficient efforts are being undertaken to revive the said subsidiary and other companies in the foreseeable future so as to recover carrying value of the investment and the diminution, if any, even if it exists is only temporary. Further, management believes that the loans and advances given to these subsidiary and companies are considered good and recoverable based on the future projections, and ongoing efforts towards obligation casted on the Company and its promoters to recover the outstanding loans in phased manner in terms of the agreements executed to give effect to the debt restructuring schemes from time to time and accordingly no provision other than those already accounted for, has been considered necessary.
- 46 The Company and its erstwhile subsidiary Bajaj Hindusthan Sugar & Industries Limited (BHSIL) (since merged) had established an aggregate of 11 new sugar mills and expanded capacity of existing sugar mills during the years 2004 to 2008. As per the Sugar Industry Promotion Policy, 2004 announced by the Government of Uttar Pradesh, the Company was entitled to various benefits in form of grant of certain exemptions/incentives as also reimbursements of certain expenses and capital subsidy, available to the eligible entrepreneurs based on the investments in setting up or expanding the sugar units in the U.P. state. While for the 8 new sugar mills set up by the Company, it had already received "Eligibility Certificate", the same is awaited for 3 new mills and expansion of 1 mill by BHSIL. Till date the Company have partly availed the benefits including capital subsidy amount. However, due to an abrupt withdrawal of policy in the year 2008, the balance amount of benefits and grant of eligibility certificate in respect of the mills of BHSIL is held up. Consequently, the Current Assets include a sum of ₹ 592.38 crore towards the aforesaid claim under 2004 Policy. The Company had initiated litigation process which was decided in favour of the Company vide an Order passed by the Hon'ble Allahabad High Court, Lucknow Bench in the year 2014 upholding the Company's entitlement to the incentive/remission/exemption etc. as per the 2004 Policy for the remaining period, with certain directions to the Company and the State Government. Subsequently dismissing the SLP filed by the State of U.P., the said Order was upheld by Hon'ble Supreme Court in the year 2018. Aggrieved by the inaction of the State of U.P. to comply with the orders of the Hon'ble Supreme Court in not processing the Company's claim even after the expiry of six weeks' time granted to complete the process of examination, the Company filed a contempt petition with Hon'ble Supreme Court, which has since been dispensed with and matter is pending for further Order. The recovery of the said claim depends upon the outcome of the said litigation and processing of claims by the State of U.P.

**47** Due to the losses incurred by Company during last few years, there has been reduction in the net worth of the Company. The losses are mainly attributable to high raw material cost i.e. sugarcane price (as fixed by Government) and relatively lower price of finished goods i.e. sugar and molasses, which are determined by market forces based on demand and supply scenario, which are external factors. As at year end, the Company has overdue instalments of certain debts and dues payable to farmers for sugarcane purchases. The Company is continuously striving for improvement in the operational efficiencies in other parameters. The debt restructuring concluded during last year 2018, under S4A scheme of RBI has resulted into improved liquidity. Keeping in view the efforts to recover its investments, loans and advances as referred to in Note 45 above and the status of its claim under Sugar Industries Promotion Policy 2004, as referred in Note 46 above, the Company expects to further improve its liquidity position. In view of the above, the management expects to generate positive cash flow from operations and timely settlement of its outstanding liabilities. Accordingly, the financial statements are continued to be presented on going concern basis, which contemplates realisation of assets and settlement of liabilities in the normal course of business.

#### **48 Capital Management**

There has not been any change in its objectives, policies and processes for managing capital from previous year. The Company is not subject to any externally imposed capital requirements.

# INDEPENDENT AUDITOR'S REPORT

## To the Members of Bajaj Hindusthan Sugar Limited

### Report on the Audit of the Consolidated Financial Statements

#### Qualified Opinion

1. We have audited the accompanying consolidated financial statements of Bajaj Hindusthan Sugar Limited (hereinafter referred to as the "Holding Company") and its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group"), which comprise the consolidated balance sheet as at March 31, 2019, and the consolidated statement of Profit and Loss including other comprehensive income, the consolidated statement of cash flows, consolidated statement of changes in equity for the year then ended, and notes to the financial statement, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements").
2. In our opinion and to the best of our information and according to the explanations given to us, except for the possible effects of the matter described in the Basis for Qualified Opinion section of our report, the aforesaid consolidated financial statements give a true and fair view in conformity with the accounting principles generally accepted in India, of their consolidated state of affairs of the group as at March 31, 2019, consolidated loss including other comprehensive income and their consolidated cash flows and consolidated changes in equity for the year ended on that date.

#### Basis for Qualified Opinion

3. We draw attention to Note No.36 (e) regarding the non-provision of premium payable on Optionally Convertible Debentures (OCDs) at the time of redemption of OCDs issued to lenders pursuant to the Scheme for Sustainable Structuring of Stressed Assets (S4A Scheme) which stipulates that the yield to maturity (YTM) being the difference between weighted average interest and coupon rate payable as redemption premium at the time of redemption of OCDs redeemable in 13 equal instalments commencing from the Financial year 2024-25. The Company considers such YTM / redemption premium as contingent liability and has not provided for the same in the books of account for the year ended March 31, 2019 amounting to ₹ 403.63 crore. The aggregate liability for such YTM from the date of allotment of OCDs till year ended March 31, 2019 is ₹ 514.50 crore from date of allotment of OCDs. Had such interest been provided, the reported loss for the year ended March 2019 would have been ₹ 540.20 crore and Net worth of the Company would have been ₹ 2,262.61 crore.

#### Material Uncertainty related to Going Concern

4. As stated in Note 45 of the consolidated financial statements, Company continues to incur losses resulting into reduction of net worth. As at year end, the Company has overdue instalments of certain debts, dues payable to farmers for sugar cane purchases. The above factors indicate a material uncertainty, which may cast significant doubt about the Company's ability to continue as a going concern. However, the management expects to generate positive cash flow from operation this year based on improvement in sugar recovery percentage & expects further improvement in the operational efficiencies in other parameters based on various corrective measures taken by the Company including the restructuring of debts as stated in the said note and the Company expects to receive benefits under the Sugar Promotion Policy 2004 pursuant to a favourable Order of Hon'ble Supreme Court of India. Accordingly, the Company is of the view that going concern of the accounting is appropriate.

Our report is not modified in respect of the above matter.

#### Emphasis of Matter

5. As stated in Note 43 to the consolidated financial statements, the Group has exposure aggregating to ₹ 770.13 crore in other companies which are related to group and ₹ 1,086.15 crore in other companies, aggregating to ₹ 1,856.28 crore, by way of investments, loans, accumulated interest on these loans. The above exposure is considered good and recoverable by the management based on the future projections, valuation reports, ongoing efforts for obligation casted on the Group and its promoters to recover the outstanding loans in phased manner in terms of the agreements executed to give effect to the debt restructuring schemes from time to time and accordingly no provision has been considered necessary.

Our report is not modified in respect of the above matter.

#### Key Audit Matters

6. Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined the matters described below to be key audit matters to be communicated in our report.

**Impairment assessment for investment, loans and interest on loan** (refer Note 2.21 (i) for accounting policy and Note 43 for Investments)

7. The Group has exposure aggregating to ₹ 770.13 crore in other companies which are related to group and ₹ 1,086.15

crore in other companies, aggregating to ₹ 1,856.28 crore, by way of investments, loans, accumulated interest on these loans. Such investment and loans and interest accrued thereon are individually assessed for impairment as per Ind AS 36 – Impairment of Assets. Such impairment assessment commences with management's evaluation on whether there is an indication of impairment loss. As part of such evaluation, based on the future projections, valuation report ongoing efforts or obligation casted on the Group and its promoters to recover the outstanding loans in phased manner in terms of the agreements executed to give effect to the debt restructuring schemes from time to time and accordingly no impairment triggers have been identified by the management based on above assessment.

8. We focussed on this area due to magnitude of the carrying value of Loans, accumulated interest on loan to other companies related to group, which comprise 9.30% of the total assets as at March 31, 2019 and are subject to annual impairment assessment.
9. Our audit procedures, in respect of testing impairment assessment for investments in Company related to group, included the following:
  - Obtained understanding of the process, evaluated the effectiveness of controls in respect of impairment assessment of Loans to other companies related to group.
  - Held discussions with management regarding appropriate implementation of policy on impairment.
  - Evaluated the future projects and valuation report of the other companies related to group.
  - Confirmations for above exposure.
  - Validated the S4A restructuring Scheme.
  - We evaluated the impairment assessment performed by management taking into account the requirements of Ind AS 36 – Impairment of Assets.

### **Information Other than the Consolidated Financial Statements and Auditor's Report Thereon**

10. The Company's Board of Directors is responsible for preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexure to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

11. In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### **Management's Responsibility for the Consolidated Financial Statements**

12. The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these consolidated financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting standards specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.
13. In preparing the consolidated financial statements, the respective Board of Directors of Companies in the Group is responsible for assessing the Group ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group are also responsible for overseeing the financial reporting process of the Group.

### **Auditor's Responsibilities for the Audit of the Consolidated Financial Statements**

14. Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
15. As part of an audit in accordance with SAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:
  - Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement

resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the Company and its subsidiary companies which are incorporated in India, has adequate internal financial controls system in place and the operating effectiveness of such controls.
  - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
  - Conclude on the appropriateness of management's use of going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
  - Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
  - Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements.
16. Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the consolidated financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the consolidated financial statements.
  17. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
  18. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
  19. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.
  20. The Consolidated financial statement includes the Financial statement of the following entities:  
**List of subsidiaries:**
    1. Bajaj Aviation Private Ltd
    2. Bajaj Power Generation Private Ltd
    3. Bajaj Hindusthan (Singapore) Private Ltd, Singapore
    4. PT. Batu Bumi Persada, Indonesia
    5. PT. Jangkar Prima, Indonesia

## Other Matter

21. We did not audit the financial statements and other financial information, in respect of three subsidiaries, whose financial statements include total assets of ₹ 1,694.97 crore as at March 31, 2019, and total revenues of ₹ 49.81 crore for the year ended on that date. These financial statements and other financial information have been audited by other auditors and whose reports have been furnished to us by the Management. Our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, and our report in terms of sub-sections (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries, is based solely on the report(s) of such other auditors.
22. We have relied on the unaudited financial statements of two subsidiaries whose financial statements reflect total assets of ₹ 4.16 crore as at March 31, 2019, total revenue of ₹ (0.62) crore for the year then ended on that date, as considered in the consolidated financial statements. These financial statements are unaudited and have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, and our report in terms of sub-sections (3) of Section 143 of the Act in so far as it relates to the aforesaid subsidiaries, is based solely on such unaudited financial statements. In our opinion and according to the information and explanations given to us by the Management, these financial statements are not material to the Group.

Our Opinion on the consolidated financial statements is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors and financial results certified by the respective management.

## Report on Other Legal and Regulatory Requirements

23. As required by Section 143(3) of the Act, we report that:

- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- b) Except for the possible effects of the matters described in the Basis of Qualified opinion paragraph above, in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss including other comprehensive income, the Consolidated Cash Flow Statement and Consolidated statement of changes in equity dealt with by this Report are in agreement with the books of account maintained for the purpose of preparation of Consolidated financial statement.
- d) In our opinion, the aforesaid consolidated financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, except requirement of Ind AS 23 on Borrowing cost with regard to matters described in the Basis of Qualified Opinion paragraph above.
- e) The going concern matter described in paragraph 4 under Material Uncertainty related to Going Concern paragraph above, in our opinion, may have adverse effect on the functioning of the Company.
- f) On the basis of the written representations received from the directors as on March 31, 2019 taken on record by the Board of Directors of the Company and its subsidiaries incorporated in India and the report of its statutory auditors subsidiaries companies incorporated in India, none of the directors of the Group Companies is disqualified as on March 31, 2019 from being appointed as a director in terms of Section 164 (2) of the Act.
- g) With respect to the adequacy of the internal financial controls over financial reporting and the operating effectiveness of such controls, refer to our separate Report in "Annexure A" which is based on the auditor's reports of the Company and its subsidiary companies incorporated in India.
- h) With respect to other matters to be included in the Auditor's Report in accordance with the requirements of Section 197(16) of the Act, as amended.

In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of Section 197 of the Act.

- i) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
  - (i) The consolidated financial statements disclose impact of pending litigations on the consolidated financial position of the Group. Refer Note 36 to the Consolidated financial statements.
  - (ii) Provision has been made in the consolidated financial statements, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts.
  - (iii) There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company and its subsidiary companies incorporated in India.

## ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 23 (g) under 'Report on Other Legal and Regulatory Requirements' section of our report to the Members of Bajaj Hindusthan Sugar Limited of even date)

### Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

1. In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended March 31, 2019, we have audited the internal financial controls over financial reporting of Bajaj Hindusthan Sugar Limited (hereinafter referred to as "Company") and its subsidiary companies, which are companies incorporated in India, as of that date.

## Management's Responsibility for Internal Financial Controls

- The Board of Directors of the Company and its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("the ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

## Auditor's Responsibility

- Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
- Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India.

## Meaning of Internal Financial Controls Over Financial Reporting

- A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls Over Financial Reporting

- Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## Opinion

- In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

## Other Matters

- Our aforesaid reports under Section 143(3) (i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to two subsidiary companies, which are companies incorporated in India, is based on the corresponding reports of the auditors of such companies incorporated in India.

## Notes forming part of consolidated financial statements

### 1 Corporate information

Bajaj Hindusthan Sugar Limited ('the Company') is a public limited company incorporated in India under the provisions of the Companies Act and its shares are listed on BSE Ltd. and National Stock Exchange of India Ltd. The registered office of the Company is situated at Golagokarannath, Lakhimpur-Kheri, District Kheri, Uttar Pradesh – 262 802, and its principal place of business is at TC-13, Vibhuti Khand, Gomti Nagar, Lucknow – 226 010. The Company is engaged in the manufacture of sugar, alcohol and generation of power.

The consolidated financial statements of the Company are for the year ended March 31, 2019 and are prepared in Indian Rupees being the functional currency. The values in Indian Rupees are rounded to crore, except otherwise indicated.

### 2 Accounting policies

#### 2.01 Basis of preparation and presentation

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) under the historical cost convention on the accrual basis except for:

- i. Certain financial assets and liabilities measured at fair value,
- ii. Defined benefit plans - plan assets measured at fair value.

The financial statements of the Company have been prepared to comply with the Indian Accounting Standards ('Ind AS') notified under Companies (Indian Accounting Standards) Rules, 2015 read with Section 133 of the Companies Act, 2013.

#### 2.02 Principles of consolidation

- i) The consolidated financial statements of the group have been prepared on the following basis:
  - The consolidated financial statements of the group are prepared in accordance with the Indian Accounting Standard - 103 "Consolidated Financial Statements".
  - The financial statements of the Company and its Subsidiary Companies have been consolidated on a line-by-line basis by adding together the book value of like items of assets, liabilities, income and expenses, after eliminating intra-group balances and intra-group transactions resulting in unrealised profits or unrealised cash losses.
  - Investment in the Associate has been accounted as per the equity method as prescribed in Indian Accounting Standard - 28.
  - The excess of cost of investment in the Subsidiary Companies over the Company's portion of equity of the Subsidiary at the date of investment made is recognised in the financial statements. The excess of Company's portion of equity of the Subsidiary over the cost of investment therein is treated as capital reserve.

The financial statements of foreign operation are translated as follows:

- The assets and liabilities are translated at the closing rate.
- Income and expenses items are translated at average rate prevailing during the year.
- All differences are accumulated in a foreign currency translation reserve on consolidation until the disposal of the net investment.
- The consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented, to the extent possible, in the same manner as the Company's separate financial statements.
- Non-controlling interest's share of net profit of consolidated subsidiaries for the year is identified and adjusted against the income of the group in order to arrive at the net income attributable to shareholders of the Company. Non-controlling interest's share of net assets of consolidated subsidiaries is identified and presented in the consolidated balance sheet separate from liabilities and the equity of the Company's shareholders.

- ii) Companies considered in the consolidated financial statements are:

Name of the company	Country of incorporation	Holding as on March 31, 2019	Financial year ends on
Subsidiaries:			
Bajaj Aviation Private Ltd.	India	100.00%	31.03.2019
Bajaj Power Generation Private Ltd.	India	100.00%	31.03.2019
Bajaj Hindusthan (Singapore) Private Ltd.	Singapore	100.00%	31.03.2019
PT. Batu Bumi Persada #	Indonesia	99.00%	31.12.2018
PT. Jangkar Prima #	Indonesia	99.88%	31.12.2018
Associates:			
Bajaj Ebiz Private Ltd. *	India	49.50%	31.03.2019
Esugarindia Ltd.*	India	69.67%	31.03.2019

# Management has compiled the accounts for year ended March 31, 2019, in order to consolidate the accounts with that of the Holding Company.

\* The Company has made provision for permanent diminution in the value of its investment in Bajaj Ebiz Private Ltd. (an associate company) and Esugarindia Ltd. (subsidiary of Bajaj Ebiz Private Ltd.). Hence, no further adjustment in the value of investment is required to be made in the consolidated financial statement.

### 2.03 Standard issued but not yet effective

- i) Ind AS 116 Leases: On March 30, 2019, Ministry of Corporate Affairs has notified Ind AS 116, Leases. Ind AS 116 will replace the existing leases Standard, Ind AS 17 Leases, and related Interpretations. The Standard sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e., the lessee and the lessor. Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than twelve months, unless the underlying asset is of low value. Currently, operating lease expenses are charged to the statement of profit & loss. The Standard also contains enhanced disclosure requirements for lessees. Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17.

The effective date for adoption of Ind AS 116 is annual periods beginning on or after April 1, 2019. The standard permits two possible methods of transition:

- Full retrospective – Retrospectively to each prior period presented applying Ind AS 8 Accounting Policies, Changes in Accounting Estimates and Errors
- Modified retrospective – Retrospectively, with the cumulative effect of initially applying the Standard recognised at the date of initial application

Under modified retrospective approach, the lessee records the lease liability as the present value of the remaining lease payments, discounted at the incremental borrowing rate and the right of use asset either as:

- a) Its carrying amount as if the standard had been applied since the commencement date, but discounted at lessee's incremental borrowing rate at the date of initial application, or
- b) An amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments related to that lease recognised under Ind AS 17 immediately before the date of initial application.

Certain practical expedients are available under both the methods.

On completion of evaluation of the effect of adoption of Ind AS 116, the Company is proposing to use the 'Modified Retrospective Approach' for transitioning to Ind AS 116, and take the cumulative adjustment to retained earnings, on the date of initial application (April 1, 2019). Accordingly, comparatives for the year ended March 31, 2019 will not be retrospectively adjusted. The Company has elected certain available practical expedients on transition.

- ii) **Ind AS 12 Appendix C**, Uncertainty over Income Tax Treatments: On March 30, 2019, Ministry of Corporate Affairs has notified Ind AS 12 Appendix C, Uncertainty over Income Tax Treatments which is to be applied while performing the determination of taxable profit (or loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under Ind AS 12. According to the appendix, companies need to determine the probability of the relevant tax authority accepting each tax treatment, or group of tax treatments, that the companies have used or plan to use in their income tax filing which has to be considered to compute the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates.

The standard permits two possible methods of transition - i) Full retrospective approach – Under this approach, Appendix C will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors, without using hindsight and ii) Retrospectively with cumulative effect of initially applying Appendix C recognised by adjusting equity on initial application, without adjusting comparatives.

The effective date for adoption of Ind AS 12 Appendix C is annual periods beginning on or after April 1, 2019. The Company will adopt the standard on April 1, 2019 and has decided to adjust the cumulative effect in equity on the date of initial application i.e. April 1, 2019 without adjusting comparatives.

The effect on adoption of Ind AS 12 Appendix C would be insignificant in the standalone financial statements.

**Amendment to Ind AS 12 – Income taxes:** On March 30, 2019, Ministry of Corporate Affairs issued amendments to the guidance in Ind AS 12, 'Income Taxes', in connection with accounting for dividend distribution taxes.

The amendment clarifies that an entity shall recognise the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events.

Effective date for application of this amendment is annual period beginning on or after April 1, 2019. The Company is currently evaluating the effect of this amendment on the standalone financial statement.

- iii) **Amendment to Ind AS 19 – Plan amendment, curtailment or settlement:** On March 30, 2019, Ministry of Corporate Affairs issued amendments to Ind AS 19, 'Employee Benefits', in connection with accounting for plan amendments, curtailments and settlements.

The amendments require an entity:

to use updated assumptions to determine current service cost and net interest for the remainder of the period after a plan amendment, curtailment or settlement; and

to recognise in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the impact of the asset ceiling.

Effective date for application of this amendment is annual period beginning on or after April 1, 2019. The Company does not have any impact on account of this amendment.

## Summary of significant accounting policies

### 2.04 Current and non-current classification

The Group presents assets and liabilities in the balance sheet based on current / non-current classification.

An asset is treated as current when it is:

- i) expected to be realised or intended to be sold or consumed in normal operating cycle,
- ii) held primarily for the purpose of trading,
- iii) expected to be realised within twelve months after the reporting period,
- iv) cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period, or
- v) carrying current portion of non-current financial assets.

All other assets are classified as non-current.

A liability is current when:

- i) it is expected to be settled in normal operating cycle;
- ii) it is held primarily for the purpose of trading;
- iii) it is due to be settled within twelve months after the reporting period;
- iv) there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period; or
- v) it includes current portion of non-current financial liabilities.

All other liabilities are classified as non-current.

### 2.05 Operating cycle

All assets and liabilities have been classified as current and non-current as per the Company's normal operating

cycle and other criteria set out above which are in accordance with Schedule III to the Act. Based on the nature of services and time between the acquisition of assets for providing of services and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current / non-current classification of assets and liabilities.

## **2.06 Property, plant and equipment**

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes purchase price, taxes and duties, labour cost and direct overheads for self-constructed assets and other direct costs incurred up to the date the asset is ready for its intended use. In case of land, Company has opted to state fair value as deemed cost on date of transition to Ind AS. When significant parts of property, plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major refurbishment is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in statement of profit and loss as incurred. Expenditure during construction period incurred on the projects under implementation are treated as pre-operative expenses pending allocation to the assets, and are included under "Capital Work-in-Progress". These expenses are apportioned to fixed assets on commencement of commercial production. Capital Work-in-Progress is stated at the amount incurred up to the date of Balance Sheet. Depreciation on property, plant and equipment is provided on straight line method and based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013 except, leasehold and improvements which are amortised over the lower of estimated useful life or lease period; on assets acquired under finance lease depreciation is provided over the lease term. Depreciation on assets added, sold or discarded during the year is provided on pro rata basis. Gains or losses arising from de-recognition of a property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is de-recognised. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

## **2.07 Leases**

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease. Assets acquired under leases other than finance leases are classified as operating leases. The total lease rentals (including scheduled rental increases) in respect of an asset taken on operating lease are charged to the statement of profit and loss on a straight line basis over the lease term unless another systematic basis is more representative of the time pattern of the benefit. Initial direct costs incurred specifically for an operating lease are deferred and charged to the statement of profit and loss over the lease term.

Assets given by the Company under operating lease are included in fixed assets. Lease income from operating leases is recognised in the statement of profit and loss on a straight line basis over the lease term unless another systematic basis is more representative of the time pattern in which benefit derived from the leased asset is determined. Costs, including depreciation, incurred in earning the lease income are recognised as expenses. Initial direct costs incurred specifically for an operating lease are deferred and recognised in the statement of profit and loss over the lease term in proportion to the recognition of lease income.

## **2.08 Intangible assets**

Intangible assets are stated at cost of acquisition net of recoverable taxes less accumulated amortisation/depletion and impairment loss, if any. The cost comprises purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for the intended use.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

Computer software are amortised over a period of 5 years. The amortisation period and the amortisation method for intangible assets with a finite useful life are reviewed at each reporting date.

## **2.09 Research & development expenditure**

Revenue expenditure on Research is expensed out in the statement of profit and loss for the year. Development costs of products are charged to the statement of profit and loss unless a product's technological feasibility and commercial has been established, in which case such expenditure is capitalised. Capital expenditure on research and development is shown as an addition to fixed assets.

## **2.10 Borrowing Cost**

Borrowing costs include exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are directly attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are charged to the profit and loss statement in the period in which they are incurred.

## 2.11 Inventories

- i) Stock of raw materials is valued at cost or net realisable value whichever is lower. Cost is arrived at on FIFO Basis.
- ii) Stock of materials-in-process and finished goods are valued at cost or net realisable value whichever is lower.
- iii) Stores, spares and packing material are valued at cost. Cost is arrived at on Weighted Average Basis.
- iv) Obsolete stores and spares when identified and technically determined, are valued at estimated realisable value.
- v) By-products - molasses and bagasse has been valued at estimated realisable value.
- vi) Trial run inventories are valued at cost or estimated realisable value whichever is lower.

## 2.12 Earnings per share

Basic EPS is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted EPS is computed using the weighted average number of equity and dilutive equity equivalent shares outstanding during the year.

## 2.13 Impairment of non-financial Assets

The carrying amount of any property, plant and equipment and intangible assets with finite lives are reviewed at each balance sheet date, if there is any indication of impairment based on internal / external factors. An asset is impaired when the carrying amount of the asset exceeds the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. An impairment loss is charged to the statement of profit and loss in the year in which an asset is identified as impaired. An impairment loss recognised in prior accounting periods is reversed if there has been change in the estimate of the recoverable amount. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

## 2.14 Provisions, contingent liabilities and contingent assets

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

## 2.15 Employee benefits

- i) Short-term employee benefits:

Short-term employee benefits are recognised as expenditure at the undiscounted value in the statement of profit and loss of the year in which the related service is rendered.

- ii) Post-employment benefits :

Defined contribution plans: Company's contribution to the superannuation scheme, provident fund scheme and pension under employees' pension scheme etc. are recognised during the year in which the related service is rendered. Monthly contributions are made to a trust administered by the Company. The interest rate payable by the trust to the beneficiaries is notified by the Government. The Company has an obligation to make good the shortfall, if any, between the return on the investments of the trust and the notified interest rate.

Defined benefit plans - gratuity: Gratuity liability is covered under the gratuity-cum-insurance policy of Life Insurance Corporation of India (LIC) administered by trust. The present value of the obligation is determined based on an actuarial valuation, using the projected unit credit method. Actuarial gains and losses in respect of post-employment and other long-term benefits are charged to the Other Comprehensive Income. The amount funded by the trust administered by the Company under the aforesaid Policy, is reduced from the gross obligation under the defined benefit plan, to recognise the obligation on a net basis.

- iii) Long-term compensated absences are provided on the basis of actuarial valuation.
- iv) Compensation to employees under Voluntary Retirement Scheme is charged to statement of profit and loss account in the year of accrual.

## 2.16 Taxation

- i) Provision for current tax is made with reference to taxable income computed for the accounting period for which the financial statements are prepared by applying the tax rates and laws that are enacted or substantively enacted at the Balance sheet date. The tax is recognised in statement of profit and loss, except to the extent that it related to items recognised in the other comprehensive income (OCI) or in other equity. In this case, the tax is also recognised in other comprehensive income and other equity.
- ii) Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of deferred tax liabilities and assets are reviewed at the end of each reporting period. Deferred tax asset on unabsorbed depreciation and carried forward losses is recognised only to the extent of deferred tax liability.
- iii) Credit of MAT is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the MAT credit becomes eligible to be recognised as an asset, the said asset is created by way of a credit to the statement of profit and loss account and shown as MAT credit entitlement. The Company reviews the same at each Balance Sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income tax during the specified period.

## 2.17 Cash and cash equivalents

Cash and cash equivalents includes cash in hand and deposits with any qualifying financial institution repayable on demand or maturing within three months from the date of acquisition and which are subject to an insignificant risk of change in value.

## 2.18 Foreign Currencies

- i) Foreign currency transactions are recorded at the rates of exchange prevailing on the date of transaction. Monetary foreign currency assets and liabilities outstanding at the close of the financial year are revalued at the exchange rates prevailing on the balance sheet date. Exchange differences arising on account of fluctuation in the rate of exchange is recognised in the statement of profit and loss. However, in respect of long-term foreign currency monetary items taken prior to April 1, 2015 being the date of transition to Ind AS, the exchange difference relating to acquisition of capital assets, has been adjusted to the capital assets.
- ii) Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or statement of profit and loss are also recognised in OCI or statement of profit and loss, respectively).

## 2.19 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment, including excise duty and excluding taxes or duties collected on behalf of the government (other than excise duty).

Revenue is recognised only if the following conditions are satisfied:

- The Company has transferred risks and rewards incidental to ownership to the customer;
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- It is probable that the economic benefit associated with the transaction will flow to the Company; and
- It can be reliably measured and it is reasonable to expect ultimate collection.

The revenue from sale of renewable energy certificates (REC) recognised in the year of sale.

Export incentives accrued under foreign trade policy are accounted for in the year of export.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Dividend income is recognised when the right to receive payment is established.

## 2.20 Government grants

The Government grants such as capital subsidies under Sugar Promotion Policy, 2004, interest free or concessional interest rate loans and subsidies related to sugar cane purchased are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed.

When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Company receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to statement of profit and loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to the financial liabilities.

## 2.21 Financial Instruments

### i) Financial assets

#### A Initial recognition

The Company classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement. Financial instruments are recognised when the group becomes a party to the contractual provisions of the instrument. Financial instruments are recognised initially at fair value plus transactions costs that are directly attributable to the acquisition or issue of the financial instrument, except for financial assets at fair value through statement of profit and loss, which are initially measured at fair value, excluding transaction costs (which is recognised in statement of profit and loss).

#### B Subsequent measurement

##### a) Financial assets carried at amortised cost (AC)

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

##### b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

##### c) Financial assets at fair value through statement of profit and loss (FVTPL)

#### Equity instruments

All equity investments in scope of Ind AS 109 are measured at fair value either as at FVTOCI or FVTPL. The company makes such election on instrument-by-instrument basis.

For equity instruments measured as at FVTOCI, all fair value changes on the instrument, excluding dividends, are recognised in the OCI. Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the P&L.

#### Investment in subsidiaries and associates

Investment in subsidiaries and associates are carried at cost.

#### Treasury shares

The Company has created a Securities Trust that holds the equity shares of the Company, which were allotted to the Trust in 2010 pursuant to the Scheme of amalgamation of its erstwhile subsidiary Bajaj Hindusthan Sugar and Industries Ltd. The Company uses Trust as a separate vehicle under the said scheme and treats as its extension and shares held by Trust are treated as treasury shares. The own equity shares that reacquired (treasury shares) are recognised at cost and deducted from equity. No gain or loss is recognised in statement of profit and loss on the purchase, sale, issue or cancellation of the Company's own equity shares. Corresponding amount of security premium is reduced from other equity.

**d) Impairment of financial assets**

The Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

1. Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, trade receivables and bank balance
2. Financial assets that are debt instruments and are measured as at FVTOCI
3. Lease receivables
4. Trade receivables or any contractual right to receive cash or another financial asset
5. Loan commitments which are not measured as at FVTPL
6. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables; and all lease receivables

The application of simplified approach does not require the Company to track changes in credit risk rather; it recognises impairment loss allowance based on 12 months ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

**ii) Financial liabilities****A Initial recognition and measurement**

All financial liabilities are recognised initially at fair value and in case of loans and borrowings and payables, net of directly attributable cost. Fees of recurring nature are directly recognised in statement profit and loss as finance cost.

**B Subsequent measurement**

Financial liabilities are subsequently carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

**a) Loans and borrowings**

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in statement of profit and loss when liabilities are derecognised. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance cost in the statement of profit and loss.

**b) Compound Financial Instruments**

At the issue date, the fair value of the liability component of a compound instrument is estimated using the market interest rate for a similar non-convertible instrument. This amount is recorded as a liability at amortised cost using the effective interest method until extinguished upon conversion or at the instrument's redemption date. The equity component is determined as the difference of the amount of the liability component from the fair value of the instrument. This is recognised in equity, net of income tax effects, and is not subsequently re-measured.

**iii) De-recognition of financial instruments**

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognised from the Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

**iv) Fair value of financial instruments**

In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value include discounted cash flow analysis, available quoted market prices. All methods of assessing fair value result in general approximation of value, and such value may vary from actual realisation on future date.

**v) Derivative financial instruments**

Derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss, except for the effective portion of cash flow hedges which is recognised in Other Comprehensive Income and later to statement of profit or loss when the hedge item effects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial assets or non-financial liability.

**2.22 Non-current assets held for sale / distribution to owners and discontinued operations**

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less cost to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt from this requirement.

An impairment loss is recognised for any initial or subsequent write-down of the assets (or disposal group) to fair value less cost to sell. A gain is recognised for any subsequent increases in fair value less cost to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

Non-current assets (including that are part of a disposal group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit and loss.

**2.23 Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below:

**i) Depreciation and useful lives of property, plant and equipment**

Property, plant and equipment are depreciated over the estimated useful lives of the assets, after taking into account their estimated residual value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological changes. The depreciation for future periods is adjusted if there are significant changes from previous estimates.

**ii) Recoverability of trade receivable**

Judgements are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

**iii) Provisions**

Provisions and liabilities are recognised in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgement to existing facts and circumstances, which can be subject to change. Since the cash outflows can take place many years in the future, the carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances.

**iv) Impairment of non-financial assets**

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where

the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transaction are taken into account, if no such transactions can be identified, an appropriate valuation model is used.

**v) Impairment of financial assets**

The impairment provisions for financial assets are based on assumptions about risk of default and expected cash loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

**vii) Fair value measurement of financial instruments**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

**viii) Recognition of Minimum Alternative Tax (MAT) as an asset**

Minimum Alternative Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period; in the year in which the MAT credit becomes eligible to be recognised as an asset. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income tax during the specified period.

**viii) Material uncertainty about going concern**

In preparing financial statements, management has made an assessment of Company's ability to continue as a going concern. Financial statements are prepared on a going concern basis. The Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern. Further details on going concern are disclosed in Note No. 45.

### 17.3 Details of securities

- Term Loans and debentures from Banks are secured on first pari passu charge basis, by way of mortgage over all immovable fixed assets and hypothecation over all movable fixed assets (both present and future) of the Company, on first pari passu charge by way of hypothecation over all current assets (both present & future) of the Company. The said loans are further secured by personal guarantee of Managing Director (Promoter) and corporate guarantee by a promoter group company, pledge of entire shares held by the Promoters of the company and 33,00,001 shares of Bajaj Energy Ltd. held by promoters group company.
- The Sugar Development Fund loan from Government of India is secured on exclusive second charge basis, by hypothecation of the whole of movable fixed assets and properties and by mortgage on the whole of immovable fixed assets and properties of the concerned sugar unit of the Company.

### 17.4 Loan from promoters

- As per terms of restructuring approved by lenders, the promoters are required to bring promoter contribution amounting to ₹ 200 crore in phased manner till September 2015 in the form of equity capital/preference capital/unsecured loan/other similar instruments. An amount of ₹ 200 crore has been brought by promoters as unsecured loan within stipulated period. Interest if any, payable shall be determined after the restructuring period is completed. Presently, said amount is treated as unsecured loan with the option to convert into equity/preference or any other similar instrument. As per Ind AS 32, contribution amount received is classified as compound instrument bifurcated into ₹ 64.22 crore as debt and ₹ 135.78 crore as other equity by discounting the amount @12% p.a. for a tenure of 10 years. The unwinding of discount in subsequent periods on loan component is recognised in the statement of profit & loss.
  - As per the approved restructuring of loan under S4A Scheme, promoter/promoters group has transferred 11,99,87,344 equity shares of ₹ 1/- per equity share to lenders as per overseeing committee recommendation as part payment of unsustainable debt. Consequently, the consideration amount of ₹ 11,99,87,344 is accounted as unsecured loan from promoters and as per Ind AS 32, said amount due to promoters is treated as compound financial instrument and bifurcated into other equity of ₹ 10.76 crore and ₹ 1.24 crore by discounting the amount @12% p.a. for a tenure of 20 years.
- 17.5 The principal of ₹ 126.75 crore on term loan are due on March 31, 2019. Paid during the month of April 2019 and May 2019.

This is a defined benefit plan and statutory liability of the Company. The Company has to pay the Gratuity to the employees as per the provisions of The Payment of Gratuity Act, 1972 irrespective of the availability of the funds with the Gratuity Fund.

The Gratuity Liability is computed on actuarial valuation basis done at year end and the Company's liability so determined as at the end of the financial year on an actuarial basis using the Project Unit Credit Method is provided for in the books of account and is based on a detailed working done by a certified Actuary. Past service cost is recognised immediately to the extent that the benefits are already vested.

The estimates of rate of escalation in salary considered in actuarial valuation, take into account inflation, seniority, promotion and other relevant factors including supply and demand in the employment market. The above information is certified by the actuary.

Company manages Gratuity obligation through Trust. Company arranges the fund based on the actuarial valuation and requirement of the Trust.

The expected contributions for Defined Benefit Plan for the next financial year will be in line with FY 2018-19.

These gratuity plan typically expose the Company to actuarial risks such as: investment risk, interest risk, longevity risk and salary risk.

#### **Investment risk**

The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference-to-market yields at the end of the reporting period on government bonds. For other defined benefit plans, the discount rate is determined by reference-to-market yield at the end of reporting period on high quality corporate bonds when there is a deep market for such bonds; if the return on plan asset is below this rate, it will create a plan deficit.

#### **Interest risk**

A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan debt investments.

#### **Longevity risk**

The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

#### **Salary risk**

The present value of the defined plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

The OCDs carry a yield to maturity (YTM) at the agreed Yield Rate accruing on an annual basis, starting from the Allotment Date. The said YTM is payable as premium on redemption along with the relevant Principal Amount on each Redemption Date [Refer Note 17.1]. The OCDs provide the lenders an option to exercise the right to convert the outstanding OCDs into the equity shares of the Company at a price in accordance with Applicable Law (including the ICDR Regulations). Since premium to be paid is contingent on the occurrence of the event of redemption of OCDs, the YTM of ₹ 514.50 crore from the date of allotment of OCD till the year end is treated as contingent liability and would be accounted for as finance cost at the time of redemption of respective OCDs.

### 38 Operating Segments/Segment information

The Company has identified its Business Segments as its Primary Reportable Segments comprising Sugar, Distillery and Power.

The Company monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the financial statements.

No operating segments have been aggregated to form the above reportable operating segments. Transfer prices between operating segments are on an arm's-length basis in a manner similar to transactions with third parties.

- 40** a) At the request of the Company, the Joint Lenders' forum (JLF Lenders) led by State Bank of India has approved the corrective action plan for restructuring of credit facilities on December 03, 2014 under JLF route in accordance with the applicable framework and guidelines issued by Reserve Bank of India. Accordingly, a Master Restructuring Agreement (MRA) has been signed on December 30, 2014 among the Company and JLF lenders, by virtue of which the restructured facilities are governed by the provisions specified in the said MRA. The cut-off date for restructuring under JLF route is July 31, 2014.
- b) The MRA as well as guidelines of Reserve Bank of India issued on debt restructuring under JLF route give a right to the JLF lenders to get recompense of their waivers and sacrifices made as per corrective action plan. The recompense payable by the Company is contingent on various factors including improved performance of the Company and many other conditions, the outcome of which currently is materially uncertain and hence the proportionate amount payable as recompense is treated as a contingent liability. The aggregate present value of recompense till March 31, 2019 payable to the JLF lenders as per MRA is approximately ₹ 189.21 crore for the Company.
- c) As per the terms of above restructuring approved by lenders, the Promoters were required to bring promoter contribution amounting to ₹ 200 crore in a phased manner till September 2015 in the form of equity capital/preference capital/unsecured loan/other similar instruments. An amount of ₹ 200 crore has been brought by promoters as unsecured loan within stipulated period.
- d) For restructuring of certain outstanding debts of the Company, the Joint Lenders' forum (JLF) of the Company adopted the scheme for sustainable structuring of stressed assets (S4A Scheme) with reference date as June 23, 2017, which was approved by the overseeing committee (OC) on November 30, 2017. As per the S4A Scheme, the total fund based debt of ₹ 8,284.59 crore (including funded interest of ₹ 354.51 crore), were bifurcated in two parts – 57.81% as Part A (Sustainable Debt) amounting to ₹ 4,789.34 crore to be serviced as per existing terms and conditions of these debts and remainder 42.19% as Part B (Unsustainable Debt) amounting to ₹ 3,495.25 crore. While a sum of ₹ 12.00 crore has been adjusted against the consideration payable to Promoters towards transfer of 11,99,87,344 equity shares, at a price of ₹ 1/- per equity share, to JLF lenders and the balance ₹ 3,483.25 crore has been converted into optionally convertible debentures allotted to the JLF lenders.
- Promoter / Promoters' group has transferred 11,99,87,344 (10.59%) equity shares, at ₹ 1/- per equity share, to JLF lenders, resulting in reduction of Promoter holding from 26.02% to 15.43% in accordance with the S4A Scheme.
- e) "Finance Cost" includes a sum of ₹ 354.51 crore during FY 2017-18, which instead of being paid in cash have been converted into OCDs as a part of "Unsustainable Debt" in accordance with the S4A Scheme, resulting into substantial savings of cash outflow during the year. The OCDs are redeemable by paying the Principal Amount together with YTM accrued till the date of respective redemption date in 13 equal annual instalments, commencing at the end of FY 2024-25.

#### 41 Financial Risk Management

The Company's activities expose it to credit risk, liquidity risk and market risk. This note explains the sources of risks which the entity is exposed to and how it mitigates that risk.

##### A Credit risk

Credit risk arises from the possibility that counterparty may not be able to settle their obligations as agreed. Company is exposed to credit risk from trade receivables, loan given and deposits with banks. To manage this, Company periodically assesses the financial reliability of customers, taking into account factors such as credit track record in the market and past dealings with the Company for extension of credit to customers. Company monitors the payment track record of the customers. Outstanding customer receivables are regularly monitored. Concentrations of credit risk are limited as a result of the Company's large and diverse customer base. Company has also taken advances and security deposits from its customer/agents, which mitigate the credit risk to an extent. The ageing of trade receivable is given below:

	Up to 6 months ₹ Crore	More than 6 months ₹ Crore	Total
<b>As at March 31, 2019</b>	<b>169.78</b>	<b>11.56</b>	<b>181.34</b>
As at March 31, 2018	161.99	7.34	169.33

Following table summarises the change in loss allowances measured using lifetime expected credit loss model. No significant changes in the estimation techniques or assumption were made during the period.

<b>As at March 31, 2019</b>	<b>26.79</b>

Company considers factors such as track record, size of the institution, market reputation and service standards to select the comparative banks with which loan / term deposits are maintained. Generally, term deposits are maintained with banks with which Company has also availed borrowings.

## B Liquidity risk

Liquidity risk is the risk that a Company may encounter difficulties in meeting its obligations associated with financial liabilities that are settled by delivering cash or other financial assets. The Group monitors rolling forecasts of its liquidity requirements to ensure it has sufficient cash to meet operational needs. The table below provides undiscounted cash flows towards financial liabilities into relevant maturity based on the remaining period at the balance sheet to the contractual maturity date.

## C Market risk

The Company is exposed to the risk of movements in interest rates, inventory price and foreign currency exchange rates that affects its assets, liabilities and future transactions.

### i) Interest rate risk

Fluctuation in fair value or future cash flows of a financial instrument because of changes in market interest rates gives rise to interest rate risk. Almost 100% of the Company's borrowings are linked to SBI base rate of the banks. With all other variables held constant, the following table demonstrates the impact of change in interest rate on borrowing cost on floating rate portion of loans.

₹ Crore				
Interest rate sensitivity	Increase / Decrease in basis point		Effect on Profit before tax	
For year ended March 31, 2019		100	+ / (-)	60.26
For year ended March 31, 2018		100	+ / (-)	67.96

**ii) Inventory price risk**

The Company is exposed to the movement in price of principal finished product i.e. sugar. Prices of the sugar cane is fixed by government. Generally, sugar production is carried out during sugar cane harvesting period from November to April. Sugar is sold throughout the year which exposes the sugar inventory to the movement in the price. Company monitors the sugar prices on daily basis and formulates the sales strategy to achieve maximum realisation. The sensitivity analysis of the change in sugar price on the inventory as at year end, other factors remaining constant is given in table below:

₹ Crore				
Rate sensitivity	Increase / Decrease in sale price		Effect on Profit before tax	
For year ended March 31, 2019		₹ 1	+/( - )	-
For year ended March 31, 2018		₹ 1	+/( - )	0.81

**iii) Foreign exchange risk**

Foreign currency risk arises commercial transactions that recognised assets and liabilities denominated in a currency that is not company's functional currency (INR). The Company is not exposed to significant foreign exchange risk at the respective reporting dates.

Bajaj Aviation Pvt Ltd, one of the subsidiary of the Company, procure spares parts, training and maintenance services for Aircraft and Helicopter in foreign currency consequently it exposures to exchange rate fluctuations.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

Currency	Year ended March 31, 2019	Year ended March 31, 2018
USD	2,06,271.24	1,52,882.70

**Foreign currency sensitivity analysis**

The following tables demonstrate the sensitivity of profit before tax to a reasonably possible change in USD exchange rates, with all other variables held constant.

₹				
Change in currency rate	Currency	Impact on statement of profit and loss	Year ended March 31, 2019	Year ended March 31, 2018
Increase by 5%	USD	( - )	7,13,402	4,97,206
Decrease by 5%	USD	+	7,13,402	4,97,206

**42 Fair value of financial assets and financial liabilities**

Financial instruments measured at fair value can be divided into three levels for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices);
- Level 3 – Inputs for the asset or liability that are not based on observable market data.

Following methods and assumptions are used to estimate the fair values:

- a) Fair value of cash and short-term deposits, trade and other short-term receivables, trade payables, other current liabilities and short-term borrowings carried at amortised cost is not materially different from its carrying cost largely due to short-term maturities of these financial assets and liabilities.
- b) Financial instruments with fixed and variable interest rate fall within level 2 of the fair value hierarchy and are evaluated by Company based on parameters such as interest rate, credit rating or assessed creditworthiness.
- c) Non-listed shares and other securities fall within level 3 of the fair value hierarchy. Valuation is based on the net asset method.
- d) Fair value of the borrowing items fall within level 2 of the fair value hierarchy and is calculated on the basis of discounted future cash flows.

Set out below is a comparison by class of the carrying amounts and fair value of the Company's financial instruments that are recognised in the financial statements.

- 43** The Company has current investments in a group company of ₹ 770.13 crore, loans and advances along with accrued interest of ₹ 1,086.33 crore recoverable from a company. While the said group company is having positive net worth and current assets in excess of its current liabilities, the other company has accumulated losses, negative net worth and current liabilities exceeding its current assets, as at the respective balance sheet dates. Management has evaluated this matter and is of the firm view that sufficient efforts are being undertaken to recover the investments. Further, management believes that the loans and advances given to the said company is considered good and recoverable based on the on-going efforts towards obligation casted on the Company and promoters to recover the outstanding loans in phased manner in terms of the agreements executed to give effect to the debt restructuring schemes from time to time and accordingly no provision has been considered necessary.
- 44** The Company and its erstwhile subsidiary Bajaj Hindusthan Sugar & Industries Limited (BHSIL) (Since merged) had established an aggregate of 11 new sugar mills and expanded capacity of existing sugar mills during the years 2004 to 2008. As per the Sugar Industry Promotion Policy, 2004 announced by the Government of Uttar Pradesh, the Company was entitled to various benefits in the form of grant of certain exemptions/incentives as also reimbursements of certain expenses and capital subsidy, available to the eligible entrepreneurs based on the investments in setting up or expanding the sugar units in the U.P. state. While for the 8 new sugar mills set up by the Company, it had already received "Eligibility Certificate", the same is awaited for 3 new mills and expansion of 1 mill by BHSIL. Till date the Company has partly availed the benefits including capital subsidy amount. However, due to an abrupt withdrawal of policy in the year 2008, the balance amount of benefits and grant of eligibility certificate in respect of the mills of BHSIL is held up. Consequently, the Current Assets include a sum of ₹ 592.38 crore towards the aforesaid claim under 2004 Policy. The Company had initiated litigation process which was decided in favour of the Company vide an Order passed by the Hon'ble Allahabad High Court, Lucknow Bench in the year 2014 upholding the Company's entitlement to the incentive/remission/exemption etc. as per the 2004 Policy for the remaining period, with certain directions to the Company and the State Government. Subsequently, dismissing the SLP filed by the State of U.P., the said Order was upheld by Hon'ble Supreme Court in the year 2018. Aggrieved by the inaction of the State of U.P. to comply with the orders of the Hon'ble Supreme Court in not processing the Company's claim even after the expiry of six weeks' time granted to complete the process of examination, the Company filed a contempt petition with Hon'ble Supreme Court, which has since been dispensed with and matter is pending for further Order. The recovery of the said claim depends upon the outcome of the said litigation and processing of claims by the State of U.P.
- 45** Due to the losses incurred by Company during the last few years, there has been reduction in the net worth of the Company. The losses are mainly attributable to high raw material cost i.e. sugarcane price (as fixed by Government) and relatively lower price of finished goods i.e. sugar and molasses, which are determined by market forces based on demand and supply scenario, which are external factors. As at year end, the Company has overdue instalments of certain debts and dues payable to farmers for sugarcane purchases. The Company is continuously striving for improvement in the operational efficiencies in other parameters. The debt restructuring concluded during last year FY 2018, under S4A scheme of RBI has resulted into improved liquidity. Keeping in view the efforts to recover its investments, loans and advances as referred to in Note 43 above and the status of its claim under Sugar Industries Promotion Policy 2004, as referred in Note 44 above, the Company expects to further improve its liquidity position. In view of the above, the management expects to generate positive cash flow from operations and timely settlement of its outstanding liabilities. Accordingly, the financial statements are continued to be presented on going concern basis, which contemplates realisation of assets and settlement of liabilities in the normal course of business.
